

Peptides at work: from structure to applications

4/7 June 2010 Naples, Italy

Centro Congressi "Federico II"

Aula Magna Partenope

The meeting

The more relevant aim of the various editions of the Naples Workshop has always been that of gathering peptide chemists interested in the Structure Activity Relationship in Bioactive Peptides in order to facilitate information and contacts among people involved in similar or contiguous researches. Each time the investigations presented were indeed representative examples of emerging subjects, which highlighted the state of the art in the continuously evolving field of biologically relevant and "man-made" peptide systems. The 12th edition of the Naples Workshop on Bioactive Peptides will be held as a joint meeting together with the 2nd Italy-Korea Symposium on Antimicrobial Peptides, which will gather leading scientists from the two Countries interested in this strategic area of research, fostering collaborations and bringing together the recognized traditions of Italy and Korea in the fields of peptide science and biotechnology.

Dates

March 31st deadline for early registration

April 10th deadline for abstract submission
