**Volume 20a:  
Three Carbon–Heteroatom Bonds:  
Acid Halides; Carboxylic Acids and Acid Salts**

	<b>Preface</b> .....	V
	<b>Volume Editor's Preface</b> .....	VII
	<b>Table of Contents</b> .....	XI
	<b>Introduction</b>	
	J. S. Panek .....	1
<b>20.1</b>	<b>Product Class 1: Acid Halides</b>	
	S. G. Nelson .....	15
<b>20.2</b>	<b>Product Class 2: Carboxylic Acids</b>	
<b>20.2.1</b>	<b>Product Subclass 1: Alkanoic Acids</b>	
<b>20.2.1.1</b>	<b>Synthesis from Carbonic Acid Derivatives</b>	
	S. J. Collier and E. Kataisto .....	53
<b>20.2.1.2</b>	<b>Synthesis from Carboxylic Acid Derivatives</b>	
	N. F. Jain and C. E. Masse .....	75
<b>20.2.1.3</b>	<b>Synthesis from Aldehydes, Ketones, and Derivatives (Including Enol Ethers)</b>	
	S. Lin, L. Yan, and P. Liu .....	93
<b>20.2.1.4</b>	<b>Synthesis from Organic Halides</b>	
	G. Evano .....	137
<b>20.2.1.5</b>	<b>Synthesis from Alcohols</b>	
	B. Figadère and X. Franck .....	173
<b>20.2.1.6</b>	<b>Synthesis from Alkenes (Excluding Reactions with Carboxylic Acid Derivatives)</b>	
	G. Evano .....	205
<b>20.2.1.7</b>	<b>Synthesis by Rearrangement</b>	
	A. J. Phillips and C. E. Love .....	241
<b>20.2.1.8</b>	<b>Synthesis with Retention of the Functional Group</b>	
	P. Vedantham, M. Jiménez, and P. R. Hanson .....	265
<b>20.2.2</b>	<b>Product Subclass 2: Arenedicarboxylic Acids</b>	
	L. R. Subramanian .....	307
<b>20.2.3</b>	<b>Product Subclass 3: Butenedioic and Butynedioic Acids</b>	
	C. E. Masse .....	329
<b>20.2.4</b>	<b>Product Subclass 4: Alkanedioic Acids</b>	
	C. E. Masse .....	337

20.2.5	<b>Product Subclass 5: 2-Oxo- and 2-Imino-Substituted Alkanoic Acids</b> J. A. Westbrook and S. E. Schaus .....	355
20.2.6	<b>Product Subclass 6: 2,2-Diheteroatom-Substituted Alkanoic Acids</b> J. A. Westbrook and S. E. Schaus .....	371
20.2.7	<b>Product Subclass 7: 2-Aminoalkanoic Acids (<math>\alpha</math>-Amino Acids)</b> S. E. Wolkenberg and R. M. Garbaccio .....	385
20.2.8	<b>Product Subclass 8: 2-Heteroatom-Substituted Alkanoic Acids</b> S. R. Chemler and T. P. Zabawa .....	483
20.2.9	<b>Product Subclass 9: Alk-2-ynoic Acids</b> G. Evano .....	507
20.2.10	<b>Product Subclass 10: Arenecarboxylic Acids</b> T. P. Yoon and E. N. Jacobsen .....	533
20.2.11	<b>Product Subclass 11: Alk-2-enoic Acids</b> C. D. Vanderwal and E. N. Jacobsen .....	551
20.2.12	<b>Product Subclass 12: 3-Oxoalkanoic and 3,3-Dioxyalkanoic Acids</b> J. Beignet .....	569
20.2.13	<b>Product Subclass 13: 3-Heteroatom-Substituted Alkanoic Acids</b> G. Sartori and R. Maggi .....	579
20.3	<b>Product Class 3: Carboxylic Acid Salts</b> L. Dakin and B. Lahue .....	605
20.4	<b>Product Class 4: Carboxylic Acid Anhydrides and Their Sulfur, Selenium, and Tellurium Derivatives</b> P. A. Keller .....	617
	<b>Keyword Index</b> .....	i
	<b>Author Index</b> .....	xxxiii
	<b>Abbreviations</b> .....	lxiii

## Table of Contents

	<b>Introduction</b> J. S. Panek	
	<b>Introduction</b> .....	1
<b>20.1</b>	<b>Product Class 1: Acid Halides</b> S. G. Nelson	
<b>20.1</b>	<b>Product Class 1: Acid Halides</b> .....	15
<b>20.1.1</b>	<b>Product Subclass 1: Acid Fluorides</b> .....	20
<b>20.1.1.1</b>	Synthesis of Product Subclass 1 .....	21
<b>20.1.1.1.1</b>	Method 1: Fluorination of Carboxylic Acids .....	21
<b>20.1.1.1.1.1</b>	Variation 1: Treatment with 2,4,6-Trifluoro-1,3,5-triazine .....	21
<b>20.1.1.1.1.2</b>	Variation 2: Treatment with Tetramethylfluoroformamidinium Hexafluorophosphate .....	22
<b>20.1.1.1.1.3</b>	Variation 3: Treatment with <i>N,N</i> -Diethylaminosulfur Trifluoride or <i>N,N</i> -Bis(2-methoxyethyl)aminosulfur Trifluoride .....	23
<b>20.1.1.1.1.4</b>	Variation 4: Treatment with Pyridinium Poly(hydrogen fluoride)/ Dicyclohexylcarbodiimide .....	25
<b>20.1.1.1.1.5</b>	Variation 5: Treatment with 1-Fluoro- <i>N,N,2</i> -trimethylprop-1-en-1-amine ..	26
<b>20.1.1.1.2</b>	Method 2: Reactions of Acid Chlorides with Fluoride Ion .....	27
<b>20.1.1.1.3</b>	Method 3: Reactions of Carboxylate Esters and Anhydrides with Hydrogen Fluoride or Hydrogen Fluoride/Pyridine .....	28
<b>20.1.2</b>	<b>Product Subclass 2: Acid Chlorides</b> .....	29
<b>20.1.2.1</b>	Synthesis of Product Subclass 2 .....	30
<b>20.1.2.1.1</b>	Method 1: Chlorination of Carboxylic Acids .....	30
<b>20.1.2.1.1.1</b>	Variation 1: Treatment with Oxalyl Chloride .....	30
<b>20.1.2.1.1.2</b>	Variation 2: Treatment with Thionyl Chloride .....	33
<b>20.1.2.1.1.3</b>	Variation 3: Treatment with Triphenylphosphine/Carbon Tetrachloride and Other Phosphorus-Based Reagents .....	36
<b>20.1.2.1.1.4</b>	Variation 4: Treatment with 1-Chloro- <i>N,N,2</i> -trimethylprop-1-en-1-amine ..	38
<b>20.1.2.1.1.5</b>	Variation 5: Treatment with Bis(trichloromethyl) Carbonate .....	39
<b>20.1.2.1.1.6</b>	Variation 6: Treatment with 2,4,6-Trichloro-1,3,5-triazine .....	40
<b>20.1.2.1.2</b>	Method 2: Chlorination of Trialkylsilyl Carboxylate Esters .....	41
<b>20.1.3</b>	<b>Product Subclass 3: Acid Bromides</b> .....	42
<b>20.1.3.1</b>	Synthesis of Product Subclass 3 .....	43
<b>20.1.3.1.1</b>	Method 1: Reactions of Carboxylic Acids with Phosphorus Tribromide ....	43
<b>20.1.3.1.2</b>	Method 2: Reactions of Carboxylic Acids or Trialkylsilyl Carboxylate Esters with Dibromotriphenylphosphorane .....	43
<b>20.1.3.1.3</b>	Method 3: Reactions of Carboxylic Acids with 1-Bromo- <i>N,N,2</i> -trimethylprop-1-en-1-amine .....	45
<b>20.1.3.1.4</b>	Method 4: Halide-Exchange Reactions of Acid Chlorides .....	46
<b>20.1.3.1.5</b>	Method 5: Oxidation of Aldehydes .....	47

<b>20.1.4</b>	<b>Product Subclass 4: Acid Iodides</b> .....	47
<b>20.1.4.1</b>	Synthesis of Product Subclass 4 .....	48
<b>20.1.4.1.1</b>	Method 1: Synthesis from Acid Chlorides .....	48
<b>20.1.4.1.2</b>	Method 2: Synthesis from Carboxylate Esters .....	49
<b>20.2</b>	<b>Product Class 2: Carboxylic Acids</b>	
<b>20.2.1</b>	<b>Product Subclass 1: Alkanoic Acids</b>	
<b>20.2.1.1</b>	<b>Synthesis from Carbonic Acid Derivatives</b> S. J. Collier and E. Kataisto	
<b>20.2.1.1</b>	<b>Synthesis from Carbonic Acid Derivatives</b> .....	53
<b>20.2.1.1.1</b>	Method 1: Reactions with Carbon Dioxide .....	53
<b>20.2.1.1.1.1</b>	Variation 1: Reaction with Unstabilized Organometallic Carbanions .....	54
<b>20.2.1.1.1.2</b>	Variation 2: Reaction with Benzylic Carbanions .....	58
<b>20.2.1.1.1.3</b>	Variation 3: Reaction with Allylic and Propargylic Carbanions .....	62
<b>20.2.1.1.1.4</b>	Variation 4: Reaction with $\alpha$ -Heteroatom-Stabilized Carbanions .....	63
<b>20.2.1.1.1.5</b>	Variation 5: Electrochemical Carboxylations .....	66
<b>20.2.1.1.1.6</b>	Variation 6: Miscellaneous Carboxylations with Carbon Dioxide .....	69
<b>20.2.1.1.2</b>	Method 2: Use of Other Carbonic Acid Derivatives .....	70
<b>20.2.1.2</b>	<b>Synthesis from Carboxylic Acid Derivatives</b> N. F. Jain and C. E. Masse	
<b>20.2.1.2</b>	<b>Synthesis from Carboxylic Acid Derivatives</b> .....	75
<b>20.2.1.2.1</b>	Method 1: Hydrolysis of Acid Halides .....	75
<b>20.2.1.2.2</b>	Method 2: Hydrolysis of Acid Anhydrides .....	76
<b>20.2.1.2.3</b>	Method 3: Hydrolysis of Esters .....	76
<b>20.2.1.2.3.1</b>	Variation 1: Base-Catalyzed Hydrolysis .....	76
<b>20.2.1.2.3.2</b>	Variation 2: Acid-Catalyzed Hydrolysis .....	78
<b>20.2.1.2.3.3</b>	Variation 3: Other Methods .....	79
<b>20.2.1.2.4</b>	Method 4: Hydrolysis of Amides .....	80
<b>20.2.1.2.4.1</b>	Variation 1: Base-Catalyzed Hydrolysis .....	80
<b>20.2.1.2.4.2</b>	Variation 2: Acid-Catalyzed Hydrolysis .....	81
<b>20.2.1.2.5</b>	Method 5: Hydrolysis of 2-Alkyl-4,5-dihydrooxazoles .....	81
<b>20.2.1.2.6</b>	Method 6: Hydrolysis of Nitriles .....	84
<b>20.2.1.2.6.1</b>	Variation 1: Base-Catalyzed Hydrolysis .....	84
<b>20.2.1.2.6.2</b>	Variation 2: Acid-Catalyzed Hydrolysis .....	85
<b>20.2.1.2.7</b>	Method 7: Hydrolysis of Ketenes .....	86
<b>20.2.1.2.8</b>	Method 8: Hydrolysis of Ketene Acetals .....	87
<b>20.2.1.2.9</b>	Method 9: Hydrolysis of 1-Heteroatom-Substituted Alkynes .....	88
<b>20.2.1.2.9.1</b>	Variation 1: Hydrolysis of 1-Haloalkynes .....	88
<b>20.2.1.2.9.2</b>	Variation 2: Hydrolysis of 1-Sulfanylalkynes .....	88
<b>20.2.1.2.9.3</b>	Variation 3: Hydrolysis of Alkynylbenzotriazoles .....	89

<b>20.2.1.3</b>	<b>Synthesis from Aldehydes, Ketones, and Derivatives (Including Enol Ethers)</b> S. Lin, L. Yan, and P. Liu	
<b>20.2.1.3</b>	<b>Synthesis from Aldehydes, Ketones, and Derivatives (Including Enol Ethers)</b>	93
<b>20.2.1.3.1</b>	Oxidation of Aldehydes	93
<b>20.2.1.3.1.1</b>	Method 1: Oxidation Using the Jones Reagent	93
<b>20.2.1.3.1.2</b>	Method 2: Oxidation Using Permanganate Salts	94
<b>20.2.1.3.1.2.1</b>	Variation 1: Using Solid-Supported Permanganate Salts	95
<b>20.2.1.3.1.3</b>	Method 3: Oxidation Using Silver(I) Oxide	96
<b>20.2.1.3.1.4</b>	Method 4: Oxidation Using Hydrogen Peroxide	97
<b>20.2.1.3.1.5</b>	Method 5: Oxidation Using Peroxy Acids	98
<b>20.2.1.3.1.6</b>	Method 6: Oxidation Using a Peroxide	101
<b>20.2.1.3.1.7</b>	Method 7: Oxidation Using Oxygen	101
<b>20.2.1.3.1.8</b>	Method 8: Oxidation Using Pyridinium Chlorochromate or Pyridinium Dichromate	103
<b>20.2.1.3.1.9</b>	Method 9: Oxidation Using Ruthenium(III) Chloride or Ruthenium(IV) Oxide and Sodium Periodate	104
<b>20.2.1.3.1.10</b>	Method 10: Oxidation Using Sodium Chlorite or Sodium Hypochlorite	105
<b>20.2.1.3.1.10.1</b>	Variation 1: Using Solid-Supported Chlorite Ion	106
<b>20.2.1.3.1.11</b>	Method 11: Oxidation Using Iodine or Bromine	107
<b>20.2.1.3.1.12</b>	Method 12: Oxidation Using Fuming Nitric Acid	108
<b>20.2.1.3.1.13</b>	Method 13: Oxidation Using Oxone	109
<b>20.2.1.3.1.14</b>	Method 14: Oxidation Using 1-Hydroxy-1,2-benziodoxol-3(1H)-one 1-Oxide	111
<b>20.2.1.3.1.15</b>	Method 15: Enzymatic Oxidation	113
<b>20.2.1.3.2</b>	Oxidation of Methyl Ketones	116
<b>20.2.1.3.2.1</b>	Method 1: Oxidation Using Halogens (Haloform Reactions)	116
<b>20.2.1.3.2.1.1</b>	Variation 1: Using Sodium Bromite	118
<b>20.2.1.3.2.2</b>	Method 2: Oxidation Using Rhenium(VII) Oxide and <i>tert</i> -Butyl Hydroperoxide	119
<b>20.2.1.3.3</b>	Oxidation of $\alpha$ -Hydroxy Ketones	120
<b>20.2.1.3.3.1</b>	Method 1: Oxidation Using the Jones Reagent	120
<b>20.2.1.3.3.2</b>	Method 2: Oxidation Using Periodic Acid or a Periodate	120
<b>20.2.1.3.3.3</b>	Method 3: Oxidation Using Bismuth(III) Mandelate and Oxygen	122
<b>20.2.1.3.3.4</b>	Method 4: Oxidation Using a Bis(1,3-diketonato)nickel(II) Complex and Oxygen	123
<b>20.2.1.3.3.5</b>	Method 5: Oxidation Using a Peroxy Acid	125
<b>20.2.1.3.4</b>	Oxidation of $\alpha$ -Oxo Ketones	126
<b>20.2.1.3.4.1</b>	Method 1: Oxidation Using Hydrogen Peroxide	126
<b>20.2.1.3.4.1.1</b>	Variation 1: Using Sodium Perborate	126
<b>20.2.1.3.5</b>	Oxidation of Aldehyde and Ketone Derivatives	127
<b>20.2.1.3.5.1</b>	Method 1: Oxidation of Acetals	127
<b>20.2.1.3.5.2</b>	Method 2: Oxidation of Enol Ethers	130
<b>20.2.1.3.5.2.1</b>	Variation 1: From O-Alkylated Enol Ethers	130
<b>20.2.1.3.5.2.2</b>	Variation 2: From O-Silylated Enol Ethers	131

<b>20.2.1.4</b>	<b>Synthesis from Organic Halides</b> G. Evano	
<hr/>		
<b>20.2.1.4</b>	<b>Synthesis from Organic Halides</b> .....	137
<b>20.2.1.4.1</b>	Carboxylation .....	137
<b>20.2.1.4.1.1</b>	Method 1: Acid-Catalyzed Carboxylation with Carbon Monoxide .....	137
<b>20.2.1.4.1.2</b>	Method 2: Transition-Metal-Catalyzed Carboxylation with Carbon Monoxide .....	138
<b>20.2.1.4.1.2.1</b>	Variation 1: Of Aryl Halides .....	138
<b>20.2.1.4.1.2.2</b>	Variation 2: Of Vinyl Halides .....	144
<b>20.2.1.4.1.2.3</b>	Variation 3: Of Benzyl Halides .....	147
<b>20.2.1.4.1.2.4</b>	Variation 4: Of Allyl Halides .....	150
<b>20.2.1.4.1.2.5</b>	Variation 5: Of Simple Alkyl Halides .....	151
<b>20.2.1.4.1.3</b>	Method 3: Carboxylation with Formate or Its Derivatives .....	152
<b>20.2.1.4.2</b>	Electrocarboxylation .....	154
<b>20.2.1.4.2.1</b>	Method 1: Electrocarboxylation with Carbon Dioxide .....	154
<b>20.2.1.4.3</b>	Metalation .....	157
<b>20.2.1.4.3.1</b>	Method 1: Metalation of an Organic Halide Followed by Carbon Dioxide Addition .....	157
<b>20.2.1.4.3.1.1</b>	Variation 1: Via Grignard Reagents .....	158
<b>20.2.1.4.3.1.2</b>	Variation 2: Via Organolithium Reagents .....	160
<b>20.2.1.4.3.1.3</b>	Variation 3: Via Other Organometallic Reagents .....	165
<b>20.2.1.4.3.2</b>	Method 2: Metalation of an Organic Halide Followed by a Ring-Opening Reaction with a Lactone .....	166
<b>20.2.1.4.4</b>	Miscellaneous Routes .....	168
<b>20.2.1.4.4.1</b>	Method 1: Coupling with Chloroform .....	168
<b>20.2.1.4.4.2</b>	Method 2: Reaction with Sodium Nitrite and Acetic Acid .....	169
<b>20.2.1.5</b>	<b>Synthesis from Alcohols</b> B. Figadère and X. Franck	
<hr/>		
<b>20.2.1.5</b>	<b>Synthesis from Alcohols</b> .....	173
<b>20.2.1.5.1</b>	Synthesis by Oxidation Mediated by Metallic Salts .....	173
<b>20.2.1.5.1.1</b>	Method 1: Electrochemical Oxidation with Mercury and Oxygen .....	174
<b>20.2.1.5.1.2</b>	Method 2: Oxidation with a Copper(II) Complex and Hydrogen Peroxide .....	174
<b>20.2.1.5.1.3</b>	Method 3: Electrochemical Oxidation with Silver and Oxygen .....	175
<b>20.2.1.5.1.4</b>	Method 4: Oxidation with Gold on Carbon and Oxygen .....	176
<b>20.2.1.5.1.5</b>	Method 5: Oxidation with Nickel .....	176
<b>20.2.1.5.1.5.1</b>	Variation 1: With Nickel Peroxide .....	176
<b>20.2.1.5.1.5.2</b>	Variation 2: Electrochemical Oxidation with Nickel(II) Hydroxide .....	177
<b>20.2.1.5.1.6</b>	Method 6: Oxidation with Palladium .....	177
<b>20.2.1.5.1.6.1</b>	Variation 1: With Palladium on Carbon and Oxygen .....	177
<b>20.2.1.5.1.6.2</b>	Variation 2: With Palladium(II) and Oxygen .....	178
<b>20.2.1.5.1.7</b>	Method 7: Oxidation with Platinum on Carbon and Oxygen .....	179
<b>20.2.1.5.1.8</b>	Method 8: Oxidation with Cobalt .....	179

20.2.1.5.1.8.1	Variation 1:	With Cobalt(II) and Hydrogen Peroxide	180
20.2.1.5.1.8.2	Variation 2:	With a Heterogeneous Cobalt–Cerium–Ruthenium Catalyst	180
20.2.1.5.1.8.3	Variations 3:	Miscellaneous Oxidations	181
20.2.1.5.1.9	Method 9:	Oxidation with Ruthenium	181
20.2.1.5.1.9.1	Variation 1:	With Ruthenium(III) Chloride and Sodium Periodate	181
20.2.1.5.1.9.2	Variation 2:	With Ruthenium(III) Chloride and Potassium Persulfate	182
20.2.1.5.1.9.3	Variation 3:	With Ruthenium(III) Chloride and Hydrogen Peroxide	182
20.2.1.5.1.9.4	Variation 4:	With Ruthenium(III) Chloride and Trichloroisocyanuric Acid	183
20.2.1.5.1.9.5	Variation 5:	Electrochemical Oxidation with Ruthenium(IV) Oxide	184
20.2.1.5.1.10	Method 10:	Oxidation with Manganese	185
20.2.1.5.1.10.1	Variation 1:	With Sodium Permanganate	185
20.2.1.5.1.10.2	Variation 2:	With Copper(II) Permanganate	185
20.2.1.5.1.10.3	Variation 3:	With Zinc(II) Permanganate	186
20.2.1.5.1.10.4	Variation 4:	With Manganese(IV) Phosphate	187
20.2.1.5.1.11	Method 11:	Oxidation with Chromium	187
20.2.1.5.1.11.1	Variation 1:	With Chromium(VI) Oxide	187
20.2.1.5.1.11.2	Variation 2:	With Potassium or Sodium Dichromate	189
20.2.1.5.1.11.3	Variation 3:	With Pyridinium Dichromate	190
20.2.1.5.1.12	Method 12:	Oxidation with Sodium Tungstate	190
20.2.1.5.1.13	Method 13:	Oxidation with Ammonium Cerium(IV) Nitrate	191
20.2.1.5.1.14	Method 14:	Oxidation with Polyoxometalates	191
20.2.1.5.2	Synthesis by Metal-Free Oxidation		192
20.2.1.5.2.1	Method 1:	Oxidation with 2,2,6,6-Tetramethylpiperidin-1-oxyl	192
20.2.1.5.2.1.1	Variation 1:	2,2,6,6-Tetramethylpiperidin-1-oxyl with Sodium Hypochlorite	193
20.2.1.5.2.1.2	Variation 2:	2,2,6,6-Tetramethylpiperidin-1-oxyl with (Diacetoxyiodo)benzene	195
20.2.1.5.2.1.3	Variations 3:	Miscellaneous Oxidations with 2,2,6,6-Tetramethylpiperidin-1-oxyl	196
20.2.1.5.2.2	Method 2:	Oxidation with Hypervalent Iodine	196
20.2.1.5.2.2.1	Variation 1:	Hypervalent Iodine(III) with Potassium Bromide	196
20.2.1.5.2.2.2	Variation 2:	Hypervalent Iodine(V)	197
20.2.1.5.2.3	Methods 3:	Miscellaneous Oxidations	198
20.2.1.5.2.3.1	Variation 1:	Oxidation with Nitric Acid	198
20.2.1.5.2.3.2	Variation 2:	Oxidation with Sodium Bromate	199
20.2.1.5.3	Synthesis by Biotransformations		200
20.2.1.5.3.1	Method 1:	Oxidation with Enzymes	200
20.2.1.5.3.2	Method 2:	Oxidation with Microorganisms	201
20.2.1.6	<b>Synthesis from Alkenes (Excluding Reactions with Carboxylic Acid Derivatives)</b> G. Evans		
20.2.1.6	<b>Synthesis from Alkenes (Excluding Reactions with Carboxylic Acid Derivatives)</b> 205		
20.2.1.6.1	Method 1:	Oxidative C=C Bond Cleavage	205
20.2.1.6.1.1	Variation 1:	Using Ozone	205

20.2.1.6.1.2	Variation 2:	Using Manganese Oxides	207
20.2.1.6.1.3	Variation 3:	Using the Lemieux–von Rudloff Reagent	209
20.2.1.6.1.4	Variation 4:	Using Ruthenium(VIII) Oxide	211
20.2.1.6.1.5	Variation 5:	Using Chromium Oxides	213
20.2.1.6.1.6	Variation 6:	Using Miscellaneous Reagents	215
20.2.1.6.2	Method 2:	Hydrocarboxylation with Carbon Monoxide	217
20.2.1.6.2.1	Variation 1:	Acid-Catalyzed Hydrocarboxylation (Koch Reaction)	218
20.2.1.6.2.2	Variation 2:	Transition-Metal-Catalyzed Hydrocarboxylation	219
20.2.1.6.3	Method 3:	Hydrocarboxylation without Carbon Monoxide	225
20.2.1.6.3.1	Variation 1:	Acid-Catalyzed Hydrocarboxylation with Formic Acid (Koch–Haaf Reaction)	225
20.2.1.6.3.2	Variation 2:	Transition-Metal-Catalyzed Hydrocarboxylation with Formic Acid	225
20.2.1.6.4	Method 4:	Hydroboration–Oxidation Sequences	226
20.2.1.6.4.1	Variation 1:	With Conservation of the Carbon Skeleton	226
20.2.1.6.4.2	Variation 2:	With One- or Two-Carbon Homologation	228
20.2.1.6.5	Method 5:	Metalation–Carboxylation Reactions	231
20.2.1.6.5.1	Variation 1:	Hydrometalation–Carboxylation Sequence	231
20.2.1.6.5.2	Variation 2:	Carbolithiation–Carboxylation Sequence	233
20.2.1.6.6	Methods 6:	Miscellaneous Methods	235
20.2.1.6.6.1	Variation 1:	Free-Radical Addition	235
20.2.1.6.6.2	Variation 2:	Using 1,1-Dichloroalkenes	235
20.2.1.7	<b>Synthesis by Rearrangement</b>		
	A. J. Phillips and C. E. Love		
20.2.1.7	<b>Synthesis by Rearrangement</b> 241		
20.2.1.7.1	Method 1:	The Favorskii Rearrangement	241
20.2.1.7.2	Method 2:	Claisen Rearrangements	246
20.2.1.7.2.1	Variation 1:	Rearrangement of Ketene Silyl Acetals (The Ireland–Claisen Rearrangement)	246
20.2.1.7.2.2	Variation 2:	Rearrangement of Zinc Enolates (The Reformatsky–Claisen Rearrangement)	254
20.2.1.7.3	Method 3:	[2,3]-Wittig Rearrangements	255
20.2.1.7.4	Method 4:	The Arndt–Eistert Reaction	257
20.2.1.7.5	Method 5:	The Benzil–Benzilic Acid Rearrangement	259
20.2.1.8	<b>Synthesis with Retention of the Functional Group</b>		
	P. Vedantham, M. Jiménez, and P. R. Hanson		
20.2.1.8	<b>Synthesis with Retention of the Functional Group</b> 265		
20.2.1.8.1	Method 1:	Synthesis by Alkylation	265
20.2.1.8.1.1	Variation 1:	Direct Alkylation of Alkanoic and Alkenoic Acids	265
20.2.1.8.1.2	Variation 2:	Regioselective Alkylation of Alkynoic Acids	266
20.2.1.8.1.3	Variation 3:	Diastereoselective Alkylation	267
20.2.1.8.2	Method 2:	Synthesis by Addition Across C–C Multiple Bonds	267
20.2.1.8.2.1	Variation 1:	Addition of Sodium Hydrogen Telluride to Alkenes	268

20.2.1.8.2.2	Variation 2:	$\omega$ -Alkynoic Acids and Aromatic Acids by Addition–Elimination	269
20.2.1.8.3	Method 3:	Synthesis by Conjugate Addition	273
20.2.1.8.3.1	Variation 1:	Asymmetric Conjugate Addition	273
20.2.1.8.3.2	Variation 2:	Stereospecific Conjugate Addition	274
20.2.1.8.4	Method 4:	Synthesis by Cycloaddition	275
20.2.1.8.4.1	Variation 1:	Diels–Alder Reaction	275
20.2.1.8.4.2	Variation 2:	Tandem Ene/Intramolecular Diels–Alder Reaction	277
20.2.1.8.4.3	Variation 3:	Asymmetric Diels–Alder Reaction	277
20.2.1.8.5	Method 5:	Synthesis by Homologation	278
20.2.1.8.5.1	Variation 1:	Homologation by One Carbon Atom	278
20.2.1.8.5.2	Variation 2:	Homologation by Multiple Carbon Atoms	279
20.2.1.8.6	Method 6:	Synthesis by Hydrogenation	281
20.2.1.8.6.1	Variation 1:	Nonselective Hydrogenation	281
20.2.1.8.6.2	Variation 2:	Regioselective Hydrogenation	284
20.2.1.8.6.3	Variation 3:	Diastereoselective Hydrogenation	285
20.2.1.8.6.4	Variation 4:	Asymmetric Hydrogenation	286
20.2.1.8.7	Method 7:	Synthesis by Alkene Isomerization	287
20.2.1.8.7.1	Variation 1:	Base-Catalyzed Deconjugation	287
20.2.1.8.7.2	Variation 2:	Z–E Isomerization	288
20.2.1.8.8	Method 8:	Synthesis by Oxidation	289
20.2.1.8.8.1	Variation 1:	Aromatization	289
20.2.1.8.8.2	Variation 2:	Oxidative Cleavage of Unsaturated Carboxylic Acids	290
20.2.1.8.8.3	Variation 3:	Oxidative Dimerization of Carboxylic Acids	290
20.2.1.8.9	Method 9:	Synthesis by Reduction	291
20.2.1.8.9.1	Variation 1:	Hydroboration Reactions	291
20.2.1.8.9.2	Variation 2:	Birch Reduction	292
20.2.1.8.10	Method 10:	Synthesis by Wittig Reaction	293
20.2.1.8.11	Method 11:	Synthesis by Resolution	294
20.2.1.8.11.1	Variation 1:	Chemical Resolution	294
20.2.1.8.11.2	Variation 2:	Enzymatic Resolution	297
20.2.1.8.12	Methods 12:	Miscellaneous Reactions	298
20.2.1.8.12.1	Variation 1:	Functional Group Transformation	298
20.2.1.8.12.2	Variation 2:	Transcarboxylation	298
20.2.1.8.12.3	Variation 3:	Ring-Closing Metathesis	299
20.2.1.8.12.4	Variation 4:	Barton’s Radical Decarboxylation	300
20.2.1.8.12.5	Variation 5:	The Kolbe Reaction	301
20.2.1.8.12.6	Variation 6:	Reactions on Solid Support	301
<b>20.2.2</b>	<b>Product Subclass 2: Arenedicarboxylic Acids</b>		
	L. R. Subramanian		
<b>20.2.2</b>	<b>Product Subclass 2: Arenedicarboxylic Acids</b>		307
20.2.2.1	Synthesis of Product Subclass 2		307
20.2.2.1.1	Method 1:	Carboxylation Using Carbon Tetrachloride and Copper Powder with Cyclodextrin as Catalyst	307
20.2.2.1.2	Method 2:	Carboxylation Using Carbon Dioxide	309
20.2.2.1.3	Method 3:	Synthesis by Carbonylation of Aryl Halides	310

20.2.2.1.3.1	Variation 1:	Under Photostimulation	310
20.2.2.1.3.2	Variation 2:	Using Palladium Complexes as Catalysts	311
20.2.2.1.4	Method 4:	Electrochemical Carboxylation of Iodoarenes	312
20.2.2.1.5	Method 5:	Hydrolysis Reactions	312
20.2.2.1.5.1	Variation 1:	Hydrolysis of Arenedinitriles	312
20.2.2.1.5.2	Variation 2:	Hydrolysis of Arenedicarboxylic Esters	313
20.2.2.1.5.3	Variation 3:	Hydrolysis of Phthalimide Derivatives	314
20.2.2.1.6	Method 6:	Ring Aromatization Using Trifluoroacetic Acid	315
20.2.2.1.7	Method 7:	Reduction of Anhydrides	317
20.2.2.1.8	Method 8:	Oxidation	318
20.2.2.1.8.1	Variation 1:	Oxidation of Alkylarenes	318
20.2.2.1.8.2	Variation 2:	Oxidation of Aromatic Aldehydes	320
20.2.2.1.8.3	Variation 3:	Oxidation of Arenes with Annulated Alcohols, Ketones, or Anhydrides	322
20.2.3	<b>Product Subclass 3: Butenedioic and Butynedioic Acids</b>		
	C. E. Masse		
20.2.3	<b>Product Subclass 3: Butenedioic and Butynedioic Acids</b> 329		
20.2.3.1	Synthesis of Product Subclass 3 329		
20.2.3.1.1	Method 1:	Butenedioic Acids by Transition-Metal Mediated Oxidation	329
20.2.3.1.1.1	Variation 1:	From Furfural	329
20.2.3.1.1.2	Variation 2:	From Furan	330
20.2.3.1.1.3	Variation 3:	From But-2-enal	330
20.2.3.1.2	Method 2:	Butenedioic Acids from 3-Oxobutanoate Esters by Rearrangement	331
20.2.3.1.3	Method 3:	Butenedioic Acids by Aldol Condensation	331
20.2.3.1.4	Method 4:	Acetylenedicarboxylic Acid by Carboxylation of Organometallic Species	333
20.2.3.1.5	Method 5:	Acetylenedicarboxylic Acid by Oxidative Methods	333
20.2.3.1.5.1	Variation 1:	Electrochemical Oxidation	333
20.2.3.1.5.2	Variation 2:	Chromic Acid Oxidation	334
20.2.3.1.6	Method 6:	Acetylenedicarboxylic Acid by Elimination Protocols	334
20.2.3.1.6.1	Variation 1:	From Halosuccinic Acids	334
20.2.3.1.6.2	Variation 2:	From Halobutenedioic Acids	335
20.2.4	<b>Product Subclass 4: Alkanedioic Acids</b>		
	C. E. Masse		
20.2.4	<b>Product Subclass 4: Alkanedioic Acids</b> 337		
20.2.4.1	Synthesis of Product Subclass 4 337		
20.2.4.1.1	Method 1:	Azeotropic Dehydration of Oxalic Acid Dihydrate with Carbon Tetrachloride	337
20.2.4.1.2	Method 2:	Oxalic Acid by Oxidative Methods	338
20.2.4.1.2.1	Variation 1:	Oxidative Dimerization of Sodium Formate	338
20.2.4.1.2.2	Variation 2:	Oxidation of Acetic Acid Derivatives	338
20.2.4.1.3	Method 3:	Malonic Acids by Cyanation of Chloroacetic Acid	339

20.2.4.1.4	Method 4:	Malonic Acids by Nucleophilic Acyl Substitution	340
20.2.4.1.4.1	Variation 1:	Microwave Hydrolysis of Meldrum's Acid Derivatives	340
20.2.4.1.4.2	Variation 2:	Phenolysis of Meldrum's Acid	341
20.2.4.1.4.3	Variation 3:	Alcoholysis of Meldrum's Acid with <i>tert</i> -Butyl Alcohol	342
20.2.4.1.4.4	Variation 4:	Using Silicon Nucleophiles	342
20.2.4.1.5	Method 5:	Malonic Acids by Acylation of Acetic Acid Derivatives	344
20.2.4.1.5.1	Variation 1:	From Lithio Dianions of Acetic Acid	344
20.2.4.1.6	Method 6:	Succinic Acids by Oxidative Coupling of Carboxylate Dianions	345
20.2.4.1.6.1	Variation 1:	Cross Coupling with Lithium $\alpha$ -Halocarboxylates	345
20.2.4.1.6.2	Variation 2:	Homocouplings Mediated by Iodine	346
20.2.4.1.7	Method 7:	Succinic Acid by Hydrolysis of Succinic Anhydride	346
20.2.4.1.8	Method 8:	Succinic Acids by Oxidative Protocols	347
20.2.4.1.8.1	Variation 1:	From Lactones	347
20.2.4.1.8.2	Variation 2:	From Nitroalkanes	348
20.2.4.1.8.3	Variation 3:	From Cyclobutanones	348
20.2.4.1.8.4	Variation 4:	From Dihalocyclobutanones	349
20.2.4.1.8.5	Variation 5:	From Halocyclobutenes	350
20.2.4.1.9	Method 9:	Succinic Acids by Allylic Alkylation	351
20.2.4.1.9.1	Variation 1:	From Chiral Allylic Carbonates	351
<b>20.2.5</b>	<b>Product Subclass 5: 2-Oxo- and 2-Imino-Substituted Alkanoic Acids</b>		
	J. A. Westbrook and S. E. Schaus		
<b>20.2.5</b>	<b>Product Subclass 5: 2-Oxo- and 2-Imino-Substituted Alkanoic Acids</b>		355
20.2.5.1	Synthesis of Product Subclass 5		355
20.2.5.1.1	Method 1:	Synthesis by Hydrolysis	355
20.2.5.1.1.1	Variation 1:	2-Oxo and 2-(Oxyimino) Acids by Hydrolysis of the Corresponding Esters	355
20.2.5.1.1.2	Variation 2:	$\alpha$ -Oxo Acids by Hydrolysis of Acyl Cyanides	358
20.2.5.1.1.3	Variation 3:	3-Aryl-2-oxopropanoic Acids by Hydrolysis of 4-(Arylmethylene)oxazol-5(4H)-ones	359
20.2.5.1.1.4	Variation 4:	Aryl(oxo)acetic Acids by Hydrolysis of Indole-2,3-diones	360
20.2.5.1.1.5	Variation 5:	$\alpha$ -Oxo Acids by Acid Hydrolysis of 2-Hydroxymorpholin-3-ones	361
20.2.5.1.2	Method 2:	Synthesis by Oxidation	361
20.2.5.1.2.1	Variation 1:	$\alpha$ -Oxo Acids by Oxidation of $\alpha$ -Amino or $\alpha$ -Hydroxy Acids	361
20.2.5.1.2.2	Variation 2:	$\alpha$ -Oxo Acids by Oxidation of Methyl Ketones	362
20.2.5.1.2.3	Variation 3:	Aryl(oxo)acetic Acids by Oxidation of 1-Aryl-2-nitroethanols	363
20.2.5.1.2.4	Variation 4:	$\alpha$ -Oxo Acids by Oxidation of $\alpha$ -Sulfanyl Esters	364
20.2.5.1.2.5	Variation 5:	$\alpha$ -Oxo Acids by Oxidative Cleavage of 2-Alkylidene-Substituted Carboxylic Acids	364
20.2.5.1.3	Method 3:	Friedel–Crafts Acylation	365
20.2.5.1.3.1	Variation 1:	Hetaryl(oxo)acetic Acids by Acylation of Hetarenes	365
20.2.5.1.3.2	Variation 2:	Oxo(phenyl)acetic Acids by Acylation of Benzenes	365
20.2.5.1.4	Method 4:	Aldol Condensations between Pyruvic Acid and Benzaldehydes	366

<b>20.2.6</b>	<b>Product Subclass 6: 2,2-Diheteroatom-Substituted Alkanoic Acids</b> J. A. Westbrook and S. E. Schaus	
<b>20.2.6</b>	<b>Product Subclass 6: 2,2-Diheteroatom-Substituted Alkanoic Acids</b> .....	371
<b>20.2.6.1</b>	Synthesis of Product Subclass 6 .....	371
<b>20.2.6.1.1</b>	Method 1: Synthesis by Hydrolysis .....	371
<b>20.2.6.1.1.1</b>	Variation 1: Hydrolysis of 2,2-Diheteroatom-Substituted Esters .....	371

<b>20.2.7.1.2.1.1.3</b>	Variation 3: Alkylation of Transition-Metal Complexes .....	389
<b>20.2.7.1.2.1.2</b>	Method 2: Alkylation of Chiral Acyclic Schiff Bases .....	390
<b>20.2.7.1.2.1.2.1</b>	Variation 1: Alkylation of Chiral <i>trans</i> -Pyrrolidine Amides .....	390
<b>20.2.7.1.2.1.2.2</b>	Variation 2: Alkylation of Chiral Acyloxazolidinones .....	391
<b>20.2.7.1.2.2</b>	Introduction of the Side Chain: Addition to Glycine Cations .....	392
<b>20.2.7.1.2.2.1</b>	Method 1: Alkylation of Cyclic Imines .....	393

20.2.7.1.2.3	Introduction of the $\alpha$ -Amino Group: Nucleophilic Addition of Nitrogen to Electrophiles .....	395
20.2.7.1.2.3.1	Method 1: Intermolecular Nucleophilic Addition to Chiral Epoxides .....	395
20.2.7.1.2.3.1.1	Variation 1: Nucleophilic Amination of $\alpha,\beta$ -Epoxy Acids Using Ammonia ..	395
20.2.7.1.2.3.1.2	Variation 2: Nucleophilic Amination of 2,3-Epoxy Alcohols Using Diazidotitanium(IV) Diisopropoxide .....	396
20.2.7.1.2.3.2	Method 2: Intramolecular Nucleophilic Addition to Epoxides .....	396
20.2.7.1.2.3.2.1	Variation 1: Intramolecular Nucleophilic Nitrogen Addition to Epoxides To Generate Cyclic Carbamates .....	397
20.2.7.1.2.3.2.2	Variation 2: Intramolecular Nucleophilic Addition to Epoxides Using Trichloroacetimidate .....	398
20.2.7.1.2.3.3	Method 3: Nucleophilic Displacement of Halides .....	399
20.2.7.1.2.3.4	Method 4: Using Azide via Chiral (Trichloromethyl)methanols .....	400
20.2.7.1.2.4	Introduction of the $\alpha$ -Amino Group: Electrophilic Amination of Enolates .....	401
20.2.7.1.2.4.1	Method 1: Electrophilic Amination of Chiral Enolates Using Azodicarboxylates .....	401
20.2.7.1.2.4.1.1	Variation 1: Electrophilic Amination of Chiral Silyl Enol Ethers with Azodicarboxylates .....	403
20.2.7.1.2.4.1.2	Variation 2: Direct Amination of Enolates with Azodicarboxylates .....	404
20.2.7.1.2.4.2	Method 2: Electrophilic Amination of Chiral Enolates Using Sulfonyl Azides .....	405
20.2.7.1.2.4.3	Method 3: Electrophilic Amination of Enolates Using a Chiral Catalyst and Azodicarboxylate .....	406
20.2.7.1.2.4.4	Method 4: Electrophilic Amination of Enolates Using 1-Chloro-1-nitrosocyclohexane .....	407
20.2.7.1.2.5	Introduction of the Nitrogen: Reductive Amination .....	409
20.2.7.1.2.5.1	Method 1: Rhodium(I)-Catalyzed Asymmetric Reductive Amination of $\alpha$ -Oxo Acids .....	409
20.2.7.1.2.5.2	Method 2: Chiral Pyridoxamine Promoted Asymmetric Reductive Amination of $\alpha$ -Oxo Acids .....	410
20.2.7.1.2.6	Asymmetric Hydrogenation of $\alpha,\beta$ -Didehydroamino Acids Using Homogeneous Catalysis .....	410
20.2.7.1.2.7	Introduction of the $\alpha$ -Hydrogen: Asymmetric Hydrogenation of $\alpha,\beta$ -Didehydroamino Acids Using Heterogeneous Catalysts .....	411
20.2.7.1.2.7.1	Method 1: Asymmetric Reduction of Hydrazono Lactones Based on Chiral <i>N</i> -Aminodihydroindoles .....	411
20.2.7.1.2.7.2	Method 2: Asymmetric Hydrogenation of Dehydropiperazinediones .....	412
20.2.7.1.2.7.3	Method 3: Asymmetric Hydrogenation Using Pinene-Based Cyclic Imino Esters as Templates .....	413
20.2.7.1.2.8	Introduction of the Carboxylate: Catalytic Asymmetric Addition of Nitriles to Imines (Strecker and Ugi Syntheses) .....	414
20.2.7.1.2.8.1	Method 1: Chiral Salicylamine Catalyzed Strecker Reaction .....	415
20.2.7.1.2.8.2	Method 2: Chiral Salicylamine–Titanium Complex Catalyzed Strecker Synthesis .....	416
20.2.7.1.2.8.3	Method 3: Chiral Guanidine Catalyzed Strecker Synthesis .....	418

20.2.7.1.2.8.4	Method 4:	Addition of Cyanide to Chiral Sulfinimines	419
20.2.7.1.2.8.5	Method 5:	Carbohydrate Templates for Asymmetric Strecker Synthesis	420
20.2.7.1.2.8.6	Method 6:	5-Amino-1,3-dioxanes as Chiral Auxiliaries	421
20.2.7.1.2.8.7	Method 7:	$\beta$ -Amino Alcohols as Chiral Auxiliaries	422
20.2.7.1.2.8.8	Method 8:	$\alpha$ -Arylethylamines as Chiral Auxiliaries	423
20.2.7.1.2.8.9	Method 9:	Asymmetric Addition of Isocyanide to Imines (Ugi Synthesis)	424
20.2.7.1.2.9		Introduction of the Side Chain: Additions to Oximes and Imino Esters	426
20.2.7.1.2.9.1	Method 1:	Copper-Catalyzed Alkylations of Imino Esters	427
20.2.7.1.2.9.2	Method 2:	Asymmetric Addition to Chiral Oximes	429
20.2.7.1.2.9.3	Method 3:	Asymmetric Addition to Camphorsultam-Based Oximes	430
20.2.7.1.2.9.4	Method 4:	[2 + 2] Cycloaddition and the $\beta$ -Lactam Route to Amino Acids	430
20.2.7.1.2.10		Introduction of the $\alpha$ -Amino Group	431
20.2.7.1.2.10.1	Method 1:	Diels–Alder Cycloaddition Reactions of Chiral Nitroso Compounds	431
20.2.7.1.2.10.2	Method 2:	Intramolecular Amidomercuration	432
20.2.7.1.2.10.3	Method 3:	Diastereoselective Michael Addition to Nitroalkenes	433
20.2.7.1.2.10.4	Method 4:	Rearrangement of Allylic Trichloroacetimidates	435
20.2.7.1.2.10.4.1	Variation 1:	Thermal Rearrangement of Allylic Trichloroacetimidates on a Chiral Template	435
20.2.7.1.2.10.4.2	Variation 2:	Diastereoselective Palladium-Catalyzed Rearrangement of Allylic Trichloroacetimidates	436
20.2.7.1.2.11		Introduction of the Side Chain: Claisen Rearrangement	437
20.2.7.1.2.11.1	Method 1:	Ester Enolate Claisen Rearrangement	437
20.2.7.1.2.11.1.1	Variation 1:	Diastereoselective Ester Enolate Claisen Rearrangement	437
20.2.7.1.2.11.1.2	Variation 2:	Enantioselective Ester Enolate Claisen Rearrangement	438
20.2.7.1.2.12		Introduction of the Carboxylate Group: Carbene Rearrangement	439
20.2.7.1.2.12.1	Method 1:	Photolysis of Chromium–Carbene Complexes	439
20.2.7.1.3		$\alpha$ -Alkyl- $\alpha$ -aminoalkanoic Acids	440
20.2.7.1.3.1		Introduction of the Side Chain: Self-Reproduction of Chirality	441
20.2.7.1.3.1.1	Method 1:	Alkylation of <i>cis</i> - and <i>trans</i> -Imidazolidinones	441
20.2.7.1.3.1.2	Method 2:	Alkylation of <i>cis</i> - and <i>trans</i> -Oxazolidinones	443
20.2.7.1.3.1.2.1	Variation 1:	Alkylation of <i>tert</i> -Butyloxazolidinones	443
20.2.7.1.3.1.2.2	Variation 2:	Alkylation of Aryloxazolidinones	444
20.2.7.1.3.1.3	Method 3:	Alkylation of Oxazolidinones, Thiazolidines, and Pyrroloindoles	446
20.2.7.1.3.1.4	Method 4:	Alkylation of Oxazaborolidinones	447
20.2.7.1.3.1.5	Method 5:	Alkylation of Chiral Borane–Amine Adducts	449
20.2.7.1.3.1.6	Method 6:	Memory of Chirality Alkylations	450
20.2.7.1.3.2		Introduction of the Side Chain: Alkylation of Chiral Amino Acid Enolates	451
20.2.7.1.3.2.1	Method 1:	Alkylation of Dihydroimidazol-4-ones	451
20.2.7.1.3.2.2	Method 2:	Oxazinone Alkylations	453
20.2.7.1.3.2.2.1	Variation 1:	5,6-Diphenyltetrahydro-1,4-oxazin-2-one Alkylation	453
20.2.7.1.3.2.2.2	Variation 2:	3,6-Dihydro-2 <i>H</i> -1,4-oxazin-2-one Alkylation	454
20.2.7.1.3.2.3	Method 3:	Alkylation of Chiral Nickel Complexes	455
20.2.7.1.3.2.4	Method 4:	Alkylation of Menthol Derivatives	455

20.2.7.1.3.3	Introduction of the Side Chain: Chiral $\beta$ -Lactams as Building Blocks	457
20.2.7.1.3.3.1	Method 1: Alkylation at C3 of a Chiral $\beta$ -Lactam	458
20.2.7.1.3.3.2	Method 2: Alkylation at the $\alpha$ -Carbon of a Chiral $\beta$ -Lactam	459
20.2.7.1.3.4	Introduction of the Side Chain: Reductive Methods	461
20.2.7.1.3.4.1	Method 1: Stereoselective Birch Reduction of Chiral Pyrrole-2-carboxylates	461
20.2.7.1.3.5	Introduction of the Side Chain: Addition to C=N Bonds	462
20.2.7.1.3.5.1	Method 1: Addition of Grignard Reagents to Chiral Dehydro-morpholinones	462
20.2.7.1.3.5.2	Method 2: Addition to Chiral Sulfinimines	462
20.2.7.1.3.6	Introduction of the Side Chain: Cycloaddition to C=C Bonds	463
20.2.7.1.3.6.1	Method 1: Diels–Alder Cycloadditions	463
20.2.7.1.3.6.2	Method 2: Cyclopropanation	464
20.2.7.1.3.6.3	Method 3: [3 + 2]-Dipolar Cycloaddition Reactions	465
20.2.7.1.3.7	Introduction of the Carboxylate: Addition of Nitrile or $\alpha$ -Bromo Ester Enolates to Imines (Strecker and Darzens Syntheses)	466
20.2.7.1.3.7.1	Method 1: Chiral Salicylamine-Based Strecker Synthesis	466
20.2.7.1.3.7.2	Method 2: Sulfinimine-Mediated Strecker Synthesis	467
20.2.7.1.3.7.3	Method 3: Chiral Dioxane-Based Strecker Synthesis	468
20.2.7.1.3.7.4	Method 4: 1-Phenylethylamine-Based Strecker Synthesis	469
20.2.7.1.3.7.5	Method 5: Morpholinone-Based Strecker Synthesis	470
20.2.7.1.3.7.6	Method 6: Darzens Condensation of $\alpha$ -Bromo Ester Enolates with Sulfinimines	471
20.2.7.1.3.8	Introduction of the Nitrogen and Carboxylate Groups	472
20.2.7.1.3.8.1	Method 1: Spirohydantoins of Ketones (Bucherer–Bergs Reaction)	472
20.2.7.1.3.9	Introduction of the Side Chain: Sigmatropic Rearrangements	473
20.2.7.1.3.9.1	Method 1: Claisen Rearrangement	473
20.2.7.1.3.10	Introduction of the $\alpha$ -Amino Group: Rearrangement of $\alpha,\alpha$ -Dialkyl- $\beta$ -carbonyl Carboxylic Acids and Sigmatropic Rearrangements	474
20.2.7.1.3.10.1	Method 1: Rearrangement of Allylic Trichloroacetimidates	474
20.2.7.1.3.10.2	Method 2: Curtius Rearrangement of $\alpha,\alpha$ -Dialkyl $\beta$ -Ester Carboxylic Acids	475
20.2.7.1.3.10.3	Method 3: Hofmann Rearrangement of $\alpha,\alpha$ -Dialkyl $\beta$ -Amido Esters	476
20.2.8	<b>Product Subclass 8: 2-Heteroatom-Substituted Alkanoic Acids</b> S. R. Chemler and T. P. Zabawa	
20.2.8	<b>Product Subclass 8: 2-Heteroatom-Substituted Alkanoic Acids</b>	483
20.2.8.1	Synthesis of Product Subclass 8	483
20.2.8.1.1	2-Haloalkanoic Acids	483
20.2.8.1.1.1	2-Fluoroalkanoic Acids	483
20.2.8.1.1.1.1	Method 1: Deaminative Fluorination (Fluorodediazonation) of Chiral $\alpha$ -Amino Acids	484

20.2.8.1.1.2	Method 2:	Electrophilic Fluorination with Acetyl Hypofluorite	485
20.2.8.1.1.3	Method 3:	Enantioselective Hydrogenation of $\alpha$ -Fluoro- $\alpha,\beta$ -unsaturated Acids	485
20.2.8.1.1.2		2-Chloroalkanoic Acids	486
20.2.8.1.1.2.1	Method 1:	Chlorination of Acylphosphonates with Sulfuryl Chloride	487
20.2.8.1.1.2.2	Method 2:	Deaminative Chlorination (Chlorodediazoni-ation) of $\alpha$ -Amino Acids	487
20.2.8.1.1.3		2-Bromoalkanoic Acids	488
20.2.8.1.1.3.1	Method 1:	Bromination of Alkanoic Acids with <i>N</i> -Bromosuccinimide	488
20.2.8.1.1.3.2	Method 2:	Deaminative Bromination (Bromodediazoni-ation) of Chiral $\alpha$ -Amino Acids	489
20.2.8.1.1.4		2-Iodoalkanoic Acids	490
20.2.8.1.1.4.1	Method 1:	2-Iodoalkanoic Acids by Treatment with Iodine and Chlorosulfonic Acid	490
20.2.8.1.2		2-Hydroxyalkanoic Acids	491
20.2.8.1.2.1	Method 1:	Deaminative Hydroxylation (Hydroxydediazoni-ation) of $\alpha$ -Amino Acids	492
20.2.8.1.2.2	Method 2:	Stereoselective Reduction of 2-Oxoalkanoic Acids and Esters	493
20.2.8.1.2.2.1	Variation 1:	Enantioselective Reduction with (+)-Chlorodiisopinocampheylborane or (-)-Diisopinocampheylborane	493
20.2.8.1.2.2.2	Variation 2:	Enzyme-Catalyzed Enantioselective Reduction	494
20.2.8.1.3		2-Alkoxyalkanoic Acids	494
20.2.8.1.3.1	Method 1:	Oxidation of a Chiral Enolate	495
20.2.8.1.3.2	Method 2:	Catalytic Enantioselective Hydrogenation of 2-(Aryloxy)but-2-enoic Acids	496
20.2.8.1.4		2,3-Epoxyalkanoic Acids	497
20.2.8.1.4.1	Method 1:	Synthesis from 2,3-Epoxyalkanoic Acid Esters	497
20.2.8.1.4.2	Method 2:	Oxidation of 2,3-Epoxyalkan-1-ols	497
20.2.8.1.5		2-Sulfanylalkanoic Acids	499
20.2.8.1.5.1	Method 1:	Nucleophilic Displacement on an $\alpha$ -Substituted Carbonyl Compound	499
20.2.8.1.5.1.1	Variation 1:	Achiral 2-Sulfanylalkanoic Acids	499
20.2.8.1.5.1.2	Variation 2:	Chiral 2-Sulfanylalkanoic Acids	499
20.2.8.1.5.2	Method 2:	Chiral 2-Sulfanylalkanoic Acids by $\alpha$ -Carboxylation	500
20.2.8.1.6		2-Selanylalkanoic Acids	501
20.2.8.1.6.1	Method 1:	Synthesis from 2-Bromoalkanoic Acids	501
20.2.8.1.7		2-Tellanylalkanoic acids	502
20.2.8.1.7.1	Method 1:	Synthesis from 2-Bromoacetic Acid	502

<b>20.2.9</b>	<b>Product Subclass 9: Alk-2-ynoic Acids</b>

<b>20.4.1.1.7</b>	Method 7: Activation of Acid Chlorides Using Pyridine-2-thiones .....	631
<b>20.4.1.1.8</b>	Method 8: Cobalt(II)-Catalyzed Reaction of Acid Chlorides .....	631
<b>20.4.1.1.9</b>	Method 9: Synthesis by Reaction of Carboxylate Anions .....	632
<b>20.4.1.1.9.1</b>	Variation 1: Reaction with Acid Chlorides .....	632
<b>20.4.1.1.9.2</b>	Variation 2: Reaction with Sulfonylpyridazinones .....	633
<b>20.4.1.1.9.3</b>	Variation 3: In Situ Halogenation of Carboxylate Anions .....	634
<b>20.4.1.1.9.4</b>	Variation 4: Using Thallium Carboxylate Salts .....	634
<b>20.4.1.1.10</b>	Method 10: Insertion of Carbon Monoxide into Arenediazonium Salts .....	635

---

<b>20.4.2</b>	<b>Product Subclass 2: Sulfur-Based Anhydrides</b> .....	636
<b>20.4.2.1</b>	Synthesis of Product Subclass 2 .....	636
<b>20.4.2.1.1</b>	Method 1: Oxo/Thioxo Anhydrides Using Hydrogen Sulfide .....	636
<b>20.4.2.1.2</b>	Method 2: Oxo/Thioxo Anhydrides Using Hydrogen Disulfide .....	637
<b>20.4.2.1.3</b>	Method 3: Oxo/Thioxo Anhydrides by Cyclization of Aromatic Compounds with Adjacent Methyl and Carboxylic Acid Substituents .....	638
<b>20.4.2.1.4</b>	Method 4: Dithioxo Anhydrides from Naphthalic Anhydride .....	638
<b>20.4.3</b>	<b>Product Subclass 3: Selenium- and Tellurium-Based Anhydrides</b> .....	639
