
**Volume 30:
Acetals: O/N, S/S, S/N, and N/N and Higher
Heteroatom Analogues**

Preface	V
Table of Contents	IX
Introduction	
J. Otera	1
30.1 Product Class 1: O,N-Acetals	
30.1.1 Product Subclass 1: Acyclic O,N-Acetals	
C. Kibayashi and N. Yamazaki	7
30.1.2 Product Subclass 2: Cyclic O,N-Acetals	
C. Kibayashi and N. Yamazaki	21
30.1.3 Product Subclass 3: Carbohydrate Derivatives (Including Nucleosides)	
H. Yamada	47
30.2 Product Class 2: O,P- and S,P-Acetals	
M. Yamashita	83
30.3 Product Class 3: S,S-Acetals	
T.-Y. Luh and M.-k. Leung	111
30.3.1 Product Subclass 1: Acyclic S,S-Acetals	
T. Takeda and A. Tsubouchi	119
30.3.2 Product Subclass 2: 1,3-Dithietanes	
T.-Y. Luh and M.-k. Leung	203
30.3.3 Product Subclass 3: 1,3-Dithiolanes	
M.-k. Leung and T.-Y. Luh	221
30.3.4 Product Subclass 4: 1,3-Dithianes	
M. Nakata	351
30.3.5 Product Subclass 5: 1,3-Dithiepanes	
M. Nakata	435
30.3.6 Product Subclass 6: Acyclic and Cyclic S,S-Acetal S-Oxides and S,S-Dioxides	
K. Ogura	447

30.3.7	Deprotection of S,S-Acetals H. Firouzabadi and N. Iranpoor	505
30.4	Product Class 4: S,N-Acetals (α-Amino Sulfur Derivatives) C. Kibayashi and N. Yamazaki	587
30.5	Product Class 5: Selenium- and Tellurium-Containing Acetals T. Murai and M. Yoshimatsu	597
30.6	Product Class 6: N,N-Acetals C. Kibayashi and N. Yamazaki	639
30.7	Product Class 7: N,P- and P,P-Acetals M. Yamashita	649
	Keyword Index	681
	Author Index	765
	Abbreviations	795

Table of Contents

Introduction

J. Otera

Introduction	1
---------------------------	---

30.1 Product Class 1: *O,N*-Acetals

30.1.1 Product Subclass 1: Acyclic *O,N*-Acetals

C. Kibayashi and N. Yamazaki

30.1.1 Product Subclass 1: Acyclic <i>O,N</i>-Acetals	7
30.1.1.1 Synthesis of Product Subclass 1	8
30.1.1.1.1 Method 1: Addition to Imine Bonds	8
30.1.1.1.2 Method 2: Addition to Carbonyl Bonds	9
30.1.1.1.2.1 Variation 1: Addition of Amines to Carbonyl Bonds	9
30.1.1.1.2.2 Variation 2: Addition of Carbanions to Carbonyl Bonds	10
30.1.1.1.2.3 Variation 3: Addition of Hydrides to Carbonyl Bonds	10
30.1.1.1.3 Method 3: Transacetalization Reactions	11
30.1.1.1.4 Methods 4: Miscellaneous Syntheses	12
30.1.1.2 Applications of Product Subclass 1 in Organic Synthesis	14
30.1.1.2.1 Method 1: Preparation of Acyclic Compounds via C—C Bond Formation with Cleavage of a C—O Bond	14
30.1.1.2.2 Method 2: Preparation of Cyclic Compounds via C—C Bond Formation with Cleavage of a C—O Bond	16
30.1.1.2.3 Methods 3: Miscellaneous Transformations	17

30.1.2 Product Subclass 2: Cyclic *O,N*-Acetals

C. Kibayashi and N. Yamazaki

30.1.2 Product Subclass 2: Cyclic <i>O,N</i>-Acetals	21
30.1.2.1 Synthesis of Product Subclass 2	21
30.1.2.1.1 Method 1: Addition to Imine Bonds	21
30.1.2.1.2 Method 2: Addition to Carbonyl Bonds	22
30.1.2.1.2.1 Variation 1: Addition of Hydrides to Carbonyl Bonds	22
30.1.2.1.2.2 Variation 2: Addition of Amines to Carbonyl Bonds	24
30.1.2.1.2.3 Variation 3: Addition of Silirane to Carbonyl Bonds	24
30.1.2.1.3 Method 3: <i>O,N</i> -Acetalization of Carbonyl Compounds	24
30.1.2.1.3.1 Variation 1: Acetalization of Carbonyl Compounds with 8-Aminomenthol	25
30.1.2.1.3.2 Variation 2: Acetalization of Carbonyl Compounds with (<i>S</i>)-Proline	25
30.1.2.1.3.3 Variation 3: Acetalization of Carbonyl Compounds with (Hydroxymethyl)pyrrolidinone	25

30.1.2.1.3.4	Variation 4:	Acetalization of Carbonyl Compounds with <i>N</i> -Mesylalanine	26
30.1.2.1.3.5	Variation 5:	Acetalization of Carbonyl Compounds with Phenylglycinol	26
30.1.2.1.3.6	Variation 6:	Acetalization of Carbonyl Compounds with Aminophenols	28
30.1.2.1.4	Method 4:	Preparation of <i>O,N</i> -Acetals via Transacetalization	29
30.1.2.1.4.1	Variation 1:	Via Intermolecular Transacetalization	29
30.1.2.1.4.2	Variation 2:	Via Intramolecular Transacetalization	31
30.1.2.1.5	Methods 5:	Miscellaneous Methods	32
30.1.2.1.5.1	Variation 1:	Preparation of <i>O,N</i> -Acetals by Oxidation	32
30.1.2.1.5.2	Variation 2:	Addition of Alcohols to Alkenyl Bonds	33
30.1.2.1.5.3	Variation 3:	Addition of Amines to Alkenyl Bonds	34
30.1.2.1.5.4	Variation 4:	Nucleophilic Substitution of Alcohols	34
30.1.2.2	Applications of Product Subclass 2 in Organic Synthesis		35
30.1.2.2.1	Method 1:	Preparation of Acyclic Compounds via C—C Bond Formation with Cleavage of a C—O Bond	35
30.1.2.2.2	Method 2:	Preparation of Cyclic Compounds via C—C Bond Formation with Cleavage of a C—O Bond	35
30.1.2.2.2.1	Variation 1:	C—C Bond Formation Using Organometallic Reagents	35
30.1.2.2.2.2	Variation 2:	C—C Bond Formation Using Allyltrimethylsilane	37
30.1.2.2.2.3	Variation 3:	Insertion of Internal π -Nucleophiles	38
30.1.2.2.3	Method 3:	Reductive Cleavage of the C—O Bond	39
30.1.2.2.3.1	Variation 1:	Reductive Cleavage by Hydrogenation	40
30.1.2.2.3.2	Variation 2:	Reductive Cleavage with Bis(2-methoxyethoxy)aluminum Hydride	40
30.1.2.2.3.3	Variation 3:	Reductive Cleavage with Sodium Borohydride–Boron Trifluoride–Diethyl Ether Complex	41
30.1.2.2.3.4	Variation 4:	Reductive Cleavage with Alane	41
30.1.2.2.3.5	Variation 5:	Reductive Cleavage with Calcium in Liquid Ammonia	42
30.1.2.2.4	Method 4:	Protection of Carbonyl Compounds	42
30.1.2.2.5	Methods 5:	Miscellaneous Transformations	43
30.1.3	Product Subclass 3: Carbohydrate Derivatives (Including Nucleosides)		
	H. Yamada		
30.1.3	Product Subclass 3: Carbohydrate Derivatives (Including Nucleosides)		47
30.1.3.1	Synthesis of Product Subclass 3		47
30.1.3.1.1	Pyrimidine Nucleosides		47
30.1.3.1.1.1	Method 1:	Substitution of Furanosyl Acetates with Silylated Pyrimidines	47
30.1.3.1.1.2	Method 2:	Synthesis from Furanosyl Halides (Hilbert–Johnson Method)	50
30.1.3.1.1.2.1	Variation 1:	Substitution by Silylated Pyrimidines	51
30.1.3.1.1.2.2	Variation 2:	Substitution by Pyrimidine Mercury Salts	55
30.1.3.1.1.2.3	Variation 3:	Activation with Mercury(II) Cyanide in Nitromethane	55
30.1.3.1.1.3	Method 3:	Synthesis from Sulfanylated Furanosides (Thiofuranosides)	56
30.1.3.1.1.3.1	Variation 1:	Synthesis from Sulfinylated Furanosides	60
30.1.3.1.1.3.2	Variation 2:	Intramolecular Glycosylation	60
30.1.3.1.1.4	Method 4:	Synthesis from Furanosyl Trichloroacetimidates	61
30.1.3.1.1.5	Method 5:	Synthesis from Pentenoses	62

30.1.3.1.1.6	Method 6: Synthesis from <i>N</i> -Furanosyl Derivatives	63
30.1.3.1.2	Purine Nucleosides	64
30.1.3.1.2.1	Method 1: Substitution of Furanosyl Acetates with Silylated Purines	64
30.1.3.1.2.1.1	Variation 1: Fusion of Sugars and Purines	67
30.1.3.1.2.2	Method 2: Synthesis from Furanosyl Halides	68
30.1.3.1.2.2.1	Variation 1: Substitution by Purine Silver and Mercury Salts	69
30.1.3.1.2.3	Method 3: Synthesis from 1-Sulfanylated Furanosides (1-Thiofuranosides)	69
30.1.3.1.2.3.1	Variation 1: Synthesis from 1-Sulfinylated Furanosides	70
30.1.3.1.2.4	Method 4: Synthesis from Furanosyl Trichloroacetimidates	71
30.1.3.1.2.5	Method 5: Synthesis from Pentenoses	72
30.1.3.1.3	Glycosyl Asparagine Derivatives	72
30.1.3.1.3.1	Method 1: Synthesis from Glycosyl Azides	72
30.1.3.1.3.1.1	Variation 1: The Staudinger Reaction	74
30.1.3.1.3.2	Method 2: Synthesis from Hexenoses	75
30.1.3.1.3.3	Method 3: Synthesis from Glycosyl Isothiocyanates	76
30.1.3.1.3.4	Method 4: Synthesis from Pentenyl Glycosides	77
30.1.3.1.3.5	Method 5: Synthesis from Glycosyl Phenyltrifluoroacetimidates	78
30.2	Product Class 2: <i>O,P</i>- and <i>S,P</i>-Acetals	
	M. Yamashita	
<hr/>		
30.2	Product Class 2: <i>O,P</i>- and <i>S,P</i>-Acetals	83
30.2.1	Product Subclass 1: <i>O,P</i>-Acetals	83
30.2.1.1	Synthesis of Product Subclass 1	83
30.2.1.1.1	Method 1: Addition of Phosphorus Compounds to Ketones or Aldehydes	83
30.2.1.1.2	Method 2: Substitution Reactions of α,β -Epoxy Phospholane 1-Oxides with Alcohols	88
30.2.1.1.3	Method 3: Oxidation of 2,3-Dihydro-1 <i>H</i> -phosphole 1-Oxides	89
30.2.1.1.3.1	Variation 1: Using Osmium(VIII) Oxide	89
30.2.1.1.3.2	Variation 2: Using Peroxides	90
30.2.1.1.4	Method 4: Addition of Phosphorus Compounds to <i>O,O</i> -Acetals and Related Compounds	91
30.2.1.1.5	Methods 5: Miscellaneous Methods	93
30.2.2	Product Subclass 2: <i>S,P</i>-Acetals	96
30.2.2.1	Synthesis of Product Subclass 2	96
30.2.2.1.1	Method 1: Reaction of α -Lithio Sulfoxides with Chlorophosphines	96
30.2.2.1.2	Method 2: Reaction of Trialkyl Phosphites with <i>Cl,S</i> -Acetals	97
30.2.2.1.3	Method 3: Reaction of α -Lithio Phosphonates or Phosphine Oxides with Sulfur Compounds	98
30.2.2.1.4	Method 4: Substitution Reactions of 1-Diazoalkylphosphonates	100
30.2.2.1.5	Method 5: Synthesis from Other <i>S,P</i> -Acetals	102
30.2.2.1.6	Methods 6: Miscellaneous Methods	105

30.3	Product Class 3: S,S-Acetals T.-Y. Luh and M.-k. Leung	
30.3	Product Class 3: S,S-Acetals	111
30.3.1	Product Subclass 1: Acyclic S,S-Acetals T. Takeda and A. Tsubouchi	
30.3.1	Product Subclass 1: Acyclic S,S-Acetals	119
30.3.1.1	Synthesis of Product Subclass 1	119
30.3.1.1.1	Method 1: Thioacetalization of Carbonyl and Related Compounds	119
30.3.1.1.1.1	Variation 1: With Protic Acid Catalysts	120
30.3.1.1.1.2	Variation 2: With Metal Salt Based Lewis Acid Catalysts	121
30.3.1.1.1.3	Variation 3: With Other Lewis Acid Catalysts	125
30.3.1.1.1.4	Variation 4: With Solid Acid Catalysts	128
30.3.1.1.1.5	Variation 5: In Ionic Liquids	128
30.3.1.1.1.6	Variation 6: With Functionalized Thiols	129
30.3.1.1.1.7	Variation 7: With Reagents Other Than Thiols	131
30.3.1.1.2	Method 2: Conversion of Acetals and Related Compounds	134
30.3.1.1.2.1	Variation 1: <i>O,O</i> -Acetals	134
30.3.1.1.2.2	Variation 2: <i>O,S</i> -Acetals	137
30.3.1.1.2.3	Variation 3: <i>O,N</i> -Acetals	137
30.3.1.1.2.4	Variation 4: <i>N,N</i> -Acetals	138
30.3.1.1.2.5	Variation 5: Enol Ethers	139
30.3.1.1.3	Method 3: Substitution of Halides with Thiolates	140
30.3.1.1.3.1	Variation 1: Of α -Haloalkyl Sulfides	140
30.3.1.1.3.2	Variation 2: Of <i>gem</i> -Dihalides	142
30.3.1.1.4	Method 4: Pummerer Reaction	144
30.3.1.1.5	Method 5: Addition of Thiols to C—C Multiple Bonds	147
30.3.1.1.5.1	Variation 1: Addition to Alkenyl Sulfides	147
30.3.1.1.5.2	Variation 2: Addition to Alkynes	148
30.3.1.1.6	Method 6: Sulfenylation of Methylene Groups Activated by Electron-Withdrawing Groups	149
30.3.1.1.7	Method 7: Reaction of Bis(alkylsulfanyl)methylithium and -sodium Compounds with Electrophiles	155
30.3.1.1.7.1	Variation 1: With Halides	155
30.3.1.1.7.2	Variation 2: With Aldehydes and Ketones	157
30.3.1.1.7.3	Variation 3: With Carboxylic Acid Derivatives	158
30.3.1.1.7.4	Variation 4: With Nitriles	161
30.3.1.1.7.5	Variation 5: With Epoxides	161
30.3.1.1.8	Method 8: Addition of Organometallic Reagents to Dithiocarboxylates	163
30.3.1.1.8.1	Variation 1: By Thiophilic Addition	163
30.3.1.1.8.2	Variation 2: By Carbophilic Addition	167
30.3.1.1.9	Method 9: Cycloaddition of Dithioesters	168
30.3.1.1.10	Method 10: Synthesis from Ketene Dithioacetals	175
30.3.1.1.10.1	Variation 1: Reduction of C=C Bonds	175

30.3.1.1.10.2	Variation 2: Addition of Organometallic Reagents to C=C Bonds	178
30.3.1.1.11	Method 11: Carbene Insertion into Disulfides and Thiols	178
30.3.1.1.12	Methods 12: Miscellaneous Methods	179
30.3.1.2	Applications of Product Subclass 1 in Organic Synthesis	185
30.3.1.2.1	Method 1: Acyl Anion Equivalents	185
30.3.1.2.2	Method 2: Reductive Desulfurization	187
30.3.1.2.3	Method 3: Dithioacetals as Thionium Ion Precursors	190
30.3.1.2.4	Method 4: Transformation of Diphenyl Dithioacetals into Titanium–Carbene Complexes	192
30.3.2	Product Subclass 2: 1,3-Dithietanes T.-Y. Luh and M.-k. Leung	
30.3.2	Product Subclass 2: 1,3-Dithietanes	203
30.3.2.1	Synthesis of Product Subclass 2	203
30.3.2.1.1	Symmetrical Dithietanes	203
30.3.2.1.1.1	Method 1: Dimerization of Thioketones	203
30.3.2.1.1.1.1	Variation 1: Thioketones Formed In Situ from Ketones	203
30.3.2.1.1.1.2	Variation 2: Thioketones Formed In Situ from Disulfides	204
30.3.2.1.1.1.3	Variation 3: Thioketones Formed In Situ from α -Chlorosulfonyl Chloride	204
30.3.2.1.1.1.4	Variation 4: Thioketones Formed In Situ from Carbon Suboxide	205
30.3.2.1.1.2	Method 2: Dimerization of Dithioacetic Acid	205
30.3.2.1.1.3	Method 3: Dimerization of 1,2-Dithiole-3-thiones	206
30.3.2.1.1.4	Method 4: Synthesis from Thiophosgene	206
30.3.2.1.1.5	Method 5: Dimerization of Thioketenes	207
30.3.2.1.1.5.1	Variation 1: Thioketenes Formed In Situ from Isothiazole-5(2H)-thione	207
30.3.2.1.1.5.2	Variation 2: Thioketenes Formed In Situ from Terminal Alkynes	208
30.3.2.1.1.5.3	Variation 3: Thioketenes Formed In Situ from Octafluoroisobutene	208
30.3.2.1.1.6	Method 6: Dimerization of Isothiocyanates	208
30.3.2.1.1.7	Method 7: Synthesis Using Carbon Disulfide	209
30.3.2.1.1.7.1	Variation 1: Reaction with Ketones	209
30.3.2.1.1.7.2	Variation 2: Reaction with Wittig Reagents	209
30.3.2.1.1.7.3	Variation 3: Reaction with Diazo Compounds	210
30.3.2.1.2	Unsymmetrical Dithietanes	210
30.3.2.1.2.1	Method 1: Synthesis from Ethene-1,1-dithiols	210
30.3.2.1.2.2	Method 2: Synthesis from Xanthates	211
30.3.2.1.2.3	Method 3: Synthesis from Thioketenes and Imines	212
30.3.2.1.2.4	Method 4: Synthesis from Ketones	212
30.3.2.1.2.5	Method 5: Synthesis from Bis(chloromethyl) Sulfoxide	213
30.3.2.1.2.6	Method 6: Cycloaddition of a Sulfinylalkane with a Thioketone	213
30.3.2.1.2.6.1	Variation 1: Sequential Oxidation of Disulfides	213
30.3.2.1.2.6.2	Variation 2: Thermolysis of Sulfenic Esters	214
30.3.2.1.2.6.3	Variation 3: Rearrangement Reactions	215
30.3.2.1.2.7	Method 7: Substitution Reactions of Dithietane	216
30.3.2.1.2.7.1	Variation 1: Fluoro-Substituted Dithietanes	216

30.3.2.1.2.7.2	Variation 2:	Acid Hydrolysis	216
30.3.2.1.2.8	Method 8:	Synthesis from Bis(chloromethyl) Sulfoxide via Reduction of Dithietane 1-Oxide	216
30.3.2.1.2.9	Method 9:	Oxidation of Dithietane	216
30.3.2.1.2.9.1	Variation 1:	Synthesis of Dithietane 1-Oxides	216
30.3.2.1.2.9.2	Variation 2:	Synthesis of Dithietane 1,3-Dioxides	217
30.3.2.1.2.9.3	Variation 3:	Synthesis of Dithietane 1,1-Dioxides	217
30.3.2.1.2.9.4	Variation 4:	Synthesis of Dithietane Trioxides	218
30.3.2.1.2.9.5	Variation 5:	Synthesis of Dithietane Tetroxides	218

30.3.3 Product Subclass 3: 1,3-Dithiolanes

M.-k. Leung and T.-Y. Luh

30.3.3	Product Subclass 3: 1,3-Dithiolanes	221	
30.3.3.1	Synthesis of Product Subclass 3	221	
30.3.3.1.1	Method 1:	Reaction of Ethane-1,2-dithiol with Aldehydes or Ketones Catalyzed by Protic Acids	221
30.3.3.1.1.1	Variation 1:	Hydrochloric Acid Catalysis	222
30.3.3.1.1.2	Variation 2:	4-Toluenesulfonic Acid Catalysis	223
30.3.3.1.1.3	Variation 3:	Trifluoroacetic Acid Catalysis	226
30.3.3.1.1.4	Variation 4:	Solid Protic Acid Catalysis	227
30.3.3.1.2	Method 2:	Lewis Acid Catalyzed Reactions of Ethane-1,2-dithiol with Aldehydes	230
30.3.3.1.2.1	Variation 1:	Catalyzed by Lithium Salts	230
30.3.3.1.2.2	Variation 2:	Catalyzed by Magnesium Salts	232
30.3.3.1.2.3	Variation 3:	Catalyzed by Boron Trifluoride–Diethyl Ether Complex	235
30.3.3.1.2.4	Variation 4:	Catalyzed by Aluminum Trichloride	240
30.3.3.1.2.5	Variation 5:	Catalyzed by Indium(III) Reagents	241
30.3.3.1.2.6	Variation 6:	Catalyzed by Silicon-Based Reagents	243
30.3.3.1.2.7	Variation 7:	Catalyzed by Tin(II) Chloride	245
30.3.3.1.2.8	Variation 8:	Catalyzed by Bismuth(III) Salts	247
30.3.3.1.2.9	Variation 9:	Catalyzed by Tellurium Tetrachloride	248
30.3.3.1.2.10	Variation 10:	Catalyzed by Scandium(III) Salts	249
30.3.3.1.2.11	Variation 11:	Catalyzed by Yttrium(III) Trifluoromethanesulfonate	251
30.3.3.1.2.12	Variation 12:	Catalyzed by Lanthanum(III) Chloride	251
30.3.3.1.2.13	Variation 13:	Catalyzed by Titanium(IV) Chloride	252
30.3.3.1.2.14	Variation 14:	Catalyzed by Zirconium(IV) Chloride	253
30.3.3.1.2.15	Variation 15:	Catalyzed by Ammonium Cerium(IV) Nitrate	254
30.3.3.1.2.16	Variation 16:	Catalyzed by Vanadyl Trifluoromethanesulfonate	255
30.3.3.1.2.17	Variation 17:	Catalyzed by Molybdenum Compounds	256
30.3.3.1.2.18	Variation 18:	Catalyzed by Tungsten(VI) Chloride	257
30.3.3.1.2.19	Variation 19:	Catalyzed by Iron(III) Chloride on Silica Gel	258
30.3.3.1.2.20	Variation 20:	Catalyzed by Ruthenium(III) Chloride	259
30.3.3.1.2.21	Variation 21:	Catalyzed by Cobalt(II) Halides	260
30.3.3.1.2.22	Variation 22:	Catalyzed by Nickel(II) Chloride	262
30.3.3.1.2.23	Variation 23:	Catalyzed by Copper(II) Salts	262
30.3.3.1.2.24	Variation 24:	Catalyzed by Zinc(II) Salts	265

30.3.3.1.2.25	Variation 25:	Catalyzed by Cadmium(II) Iodides	269
30.3.3.1.2.26	Variation 26:	Catalyzed by Lanthanide(III) Trifluoromethanesulfonates	270
30.3.3.1.3	Method 3:	Reaction of Ethane-1,2-dithiol with Aldehydes or Ketones Catalyzed Using Heterogeneous Catalysts	271
30.3.3.1.4	Method 4:	Reaction of Ethane-1,2-dithiol with Aldehydes or Ketones Catalyzed by Halogens and Derivatives	273
30.3.3.1.4.1	Variation 1:	Catalyzed by Iodine	273
30.3.3.1.4.2	Variation 2:	Catalyzed by Tetrabutylammonium Tribromide	276
30.3.3.1.4.3	Variation 3:	Catalyzed by <i>N</i> -Bromosuccinimide	277
30.3.3.1.4.4	Variation 4:	Catalyzed by Bromo(dimethyl)sulfonium Bromide	277
30.3.3.1.4.5	Variation 5:	Catalyzed by 2,3,5,6-Tetrabromobenzo-1,4-quinone	278
30.3.3.1.4.6	Variation 6:	Catalyzed by Trichloroisocyanuric Acid	280
30.3.3.1.4.7	Variation 7:	Catalyzed by Thionyl Chloride	281
30.3.3.1.5	Method 5:	Reaction of Ethane-1,2-dithiol with Aldehydes or Ketones Catalyzed by Ionic Liquids	282
30.3.3.1.6	Method 6:	Reaction of Ethane-1,2-dithiol with Aldehydes or Ketones Catalyzed by Surfactant	283
30.3.3.1.7	Method 7:	Reaction of Ethane-1,2-dithiol with Masked Carbonyl Groups	284
30.3.3.1.7.1	Variation 1:	Reactions with Enol Ethers	284
30.3.3.1.7.2	Variation 2:	Reactions with Enamines, Imines, and Related Compounds	285
30.3.3.1.7.3	Variation 3:	Double Michael Addition of Ethane-1,2-dithiol to Dinitroalkenes and Related Compounds	287
30.3.3.1.7.4	Variation 4:	Displacement of Geminal Dichloro Compounds	288
30.3.3.1.8	Method 8:	Reaction of <i>O,O</i> -Acetals or Hemiacetals with Ethane-1,2-dithiol	289
30.3.3.1.8.1	Variation 1:	Catalyzed by Protic Acid	289
30.3.3.1.8.2	Variation 2:	Catalyzed by Lewis Acids	290
30.3.3.1.8.3	Variation 3:	Catalyzed by Heterogeneous Catalysts	297
30.3.3.1.8.4	Variation 4:	Catalyzed by Halogens and Derivatives	299
30.3.3.1.8.5	Variation 5:	Catalyzed by Phosphoryl Chloride on Montmorillonite	304
30.3.3.1.9	Method 9:	Reaction of <i>O,S</i> -Acetals with Ethane-1,2-dithiol	305
30.3.3.1.10	Method 10:	Reaction of <i>S,S</i> -Acetals with Ethane-1,2-dithiol	306
30.3.3.1.11	Method 11:	Reaction of <i>N,N</i> -Acetals with Ethane-1,2-dithiol	306
30.3.3.1.12	Method 12:	Reaction of Ethane-1,2-dithiol with Oxazolidine Derivatives	307
30.3.3.1.13	Method 13:	Reactions of Carbonyl Compounds or Masked Carbonyl Compounds with Modified Ethane-1,2-dithiols	308
30.3.3.1.13.1	Variation 1:	With Silyl Thioethers	308
30.3.3.1.13.2	Variation 2:	With Thiostannanes	309
30.3.3.1.13.3	Variation 3:	With 2-Substituted 1,3,2-Dithiaborolanes	311
30.3.3.1.13.4	Variation 4:	With Bis(diisobutylaluminum) Ethane-1,2-dithiolate	312
30.3.3.1.13.5	Variation 5:	Dithioacetalization from a 1,3-Dithiolane to Another Carbonyl Group	313
30.3.3.1.14	Method 14:	Nucleophilic Displacements Using <i>S,S'</i> -Ethane-1,2-diyl Bis(4-toluenesulfonothioate)	316
30.3.3.1.14.1	Variation 1:	Reaction with 2-Naphthol	316
30.3.3.1.14.2	Variation 2:	Reactions with α -Hydroxymethylene Ketones	316
30.3.3.1.15	Method 15:	Reactions of Carbonyl Compounds with Substituted Ethane-1,2-dithiols	317

30.3.3.1.15.1	Variation 1:	Catalyzed by Protic Acids	317
30.3.3.1.15.2	Variation 2:	Catalyzed by Lewis Acids	318
30.3.3.1.15.3	Variation 3:	Catalyzed by Sulfur Dioxide	319
30.3.3.1.16	Method 16:	Cycloaddition of Thiiranes with Thiocarbonyl Compounds	320
30.3.3.1.17	Method 17:	Reaction of Dithioacetic Acid with 3-Methylbut-3-en-1-yne	320
30.3.3.1.18	Method 18:	1,3-Dipolar Cycloaddition of Ylides with Thiocarbonyl Compounds	321
30.3.3.1.19	Method 19:	Metalation	324
30.3.3.1.19.1	Variation 1:	Electrophilic Addition of [1,3-Dithiolan-2-ylidene(ethoxy)-methoxy]trimethylsilane	326
30.3.3.1.19.2	Variation 2:	2-(Trimethylsilyl)-1,3-dithiolane as a Masked 1,3-Dithiolane Anion	327
30.3.3.1.20	Method 20:	Reaction of 2-Ethoxy-1,3-dithiolane with Nucleophiles	328
30.3.3.1.21	Method 21:	Reaction of 1,3-Dithiolan-2-ylum Tetrafluoroborate with Nucleophiles	330
30.3.3.1.22	Method 22:	Reduction of Ketene <i>S,S</i> -Acetals	331
30.3.3.1.23	Method 23:	Cycloadditions of Ketene <i>S,S</i> -Acetals	332
30.3.3.1.23.1	Variation 1:	[2+2] Cycloaddition	332
30.3.3.1.23.2	Variation 2:	[4+2] Cycloaddition	333
30.3.3.1.23.3	Variation 3:	[3+2] Cycloaddition	338
30.3.3.1.23.4	Variation 4:	[8+2] Cycloaddition	340
30.3.4	Product Subclass 4: 1,3-Dithianes		
	M. Nakata		
30.3.4	Product Subclass 4: 1,3-Dithianes		351
30.3.4.1	Synthesis of Product Subclass 4		351
30.3.4.1.1	Method 1:	Thioacetalization of Carbonyl Compounds	351
30.3.4.1.1.1	Variation 1:	Using Hydrogen Chloride, Zinc(II) Chloride, or Boron Trifluoride–Diethyl Ether Complex	351
30.3.4.1.1.2	Variation 2:	Using Lewis Acids Other than Zinc(II) Chloride	352
30.3.4.1.1.3	Variation 3:	Using Solid-Supported Catalysts	353
30.3.4.1.1.4	Variation 4:	Using Other Catalysts or Reagents	354
30.3.4.1.2	Method 2:	Thioacetalization of Hemiacetals, <i>O,O</i> -Acetals, <i>O,N</i> -Acetals, and Enol Ethers	355
30.3.4.1.3	Method 3:	Thioacetalization with Polymer-Supported Propane-1,3-dithiol	357
30.3.4.1.4	Method 4:	Conjugate Addition of Propane-1,3-dithiol to Alk-1-ynyl Ketones and Esters	357
30.3.4.1.5	Method 5:	Synthesis from 1,3-Dithia-2-silacyclohexanes, 1,3-Dithia-2-stannacyclohexanes, and 1,3,2-Dithiaborinane	359
30.3.4.1.6	Method 6:	Other Syntheses	360
30.3.4.1.7	Method 7:	Metalation of 1,3-Dithianes	362
30.3.4.1.7.1	Variation 1:	Using Butyllithium	362
30.3.4.1.7.2	Variation 2:	Using Other Metalation Reagents	363
30.3.4.1.7.3	Variation 3:	Transmetalation of 2-Lithio-1,3-dithianes	366

30.3.4.1.7.4	Variation 4:	Metalation of 1,3-Dithianes Containing an Electron-Withdrawing Substituent	367
30.3.4.1.7.5	Variation 5:	Synthesis of 2-Stannyl-1,3-dithianes	368
30.3.4.1.7.6	Variation 6:	Metalation of 2-Methylene-1,3-dithianes	370
30.3.4.1.7.7	Variation 7:	Conformational Preference of 2-Metallo-1,3-dithianes	372
30.3.4.1.8	Method 8:	Substitution Reactions	373
30.3.4.1.8.1	Variation 1:	Of 2-Lithio-1,3-dithiane Derivatives with Primary Alkyl Halides	373
30.3.4.1.8.2	Variation 2:	Of 2-Lithio-1,3-dithiane Derivatives with Secondary Alkyl Halides	375
30.3.4.1.8.3	Variation 3:	Of 2-Lithio-1,3-dithiane Derivatives with Primary Sulfonates	376
30.3.4.1.8.4	Variation 4:	Of 2-Lithio-1,3-dithiane with Monosubstituted Epoxides	378
30.3.4.1.8.5	Variation 5:	Of 2-Lithio-1,3-dithiane with 1,1- and 1,2-Disubstituted Epoxides	379
30.3.4.1.8.6	Variation 6:	Of 2-Lithio-1,3-dithiane Derivatives with Monosubstituted Epoxides	382
30.3.4.1.8.7	Variation 7:	Of 2-Lithio-1,3-dithiane Derivatives with 1,2-Disubstituted Epoxides	384
30.3.4.1.8.8	Variation 8:	Of 2-Lithio-1,3-dithiane Derivatives with Aziridines	385
30.3.4.1.9	Method 9:	Addition Reactions	386
30.3.4.1.9.1	Variation 1:	Of 2-Lithio-1,3-dithianes to Aldehydes	386
30.3.4.1.9.2	Variation 2:	Of 2-Lithio-1,3-dithianes to Ketones	388
30.3.4.1.9.3	Variation 3:	Of 2-Lithio-1,3-dithianes to Carboxylic Acid Derivatives	390
30.3.4.1.9.4	Variation 4:	Of 2-Lithio-1,3-dithiane Derivatives to C=N and C=C Compounds	393
30.3.4.1.10	Method 10:	1,2- and 1,4-Addition Reactions	395
30.3.4.1.10.1	Variation 1:	Of 2-Lithio-1,3-dithiane Derivatives to α,β -Unsaturated Carbonyl Compounds	395
30.3.4.1.10.2	Variation 2:	1,2-Addition Reactions of 2-Lithio-1,3-dithiane Derivatives to α,β -Unsaturated Carbonyl Compounds	398
30.3.4.1.10.3	Variation 3:	1,4-Addition Reactions of 2-Lithio-1,3-dithiane Derivatives to α,β -Unsaturated Carbonyl Compounds	399
30.3.4.1.10.4	Variation 4:	1,4-Addition Reactions of 2-Lithio-1,3-dithiane Derivatives to Other α,β -Unsaturated Compounds	401
30.3.4.1.11	Method 11:	Double Alkylation of 1,3-Dithiane with Two Electrophiles	401
30.3.4.1.12	Method 12:	Multicomponent Coupling of 2-Silyl-1,3-dithianes	405
30.3.4.1.13	Method 13:	Reactions of 2-Silyl-1,3-dithiane Derivatives	408
30.3.4.1.13.1	Variation 1:	With Aldehydes and Ketones	408
30.3.4.1.13.2	Variation 2:	With Alkyl Halides	410
30.3.4.1.14	Method 14:	Synthesis and Reactions of 2-Phosphoryl-1,3-dithiane Derivatives	411
30.3.4.1.15	Method 15:	Reactions of 2-Vinyl- and 2-Vinylidene-1,3-dithiane Derivatives	412
30.3.4.1.16	Method 16:	Synthesis and Reactions of 1,3-Dithiane 2-Carbocations	414
30.3.4.1.17	Method 17:	Synthesis and Reactions of 1,3-Dithiane Radicals	416
30.3.4.1.18	Methods 18:	Other Methods	418
30.3.4.2		Applications of Product Subclass 4 in Organic Syntheses	421
30.3.4.2.1	Method 1:	Reductive Desulfurizations	421

30.3.4.2.2	Method 2: Ring-Expansion Reactions	422
30.3.4.2.3	Methods 3: Miscellaneous Reactions	425
30.3.5	Product Subclass 5: 1,3-Dithiepanes M. Nakata	
<hr/>		
30.3.5	Product Subclass 5: 1,3-Dithiepanes	435
30.3.5.1	Synthesis of Product Subclass 5	435
30.3.5.1.1	Method 1: Thioacetalization of Carbonyl Compounds	435
30.3.5.1.1.1	Variation 1: Using Hydrogen Chloride, 4-Toluenesulfonic Acid, or Boron Trifluoride–Diethyl Ether Complex	435
30.3.5.1.1.2	Variation 2: Using Other Lewis Acids	436
30.3.5.1.2	Method 2: Nucleophilic Substitution Reactions	438
30.3.5.1.3	Method 3: 1,2- and 1,4-Addition Reactions with 2-Lithio-1,3-dithiepanes	440
30.3.5.1.4	Method 4: Synthesis of 2-Alkylidene-1,3-dithiepanes	441
30.3.5.1.5	Methods 5: Miscellaneous Syntheses	442
30.3.5.2	Applications of Product Subclass 5 in Organic Synthesis	444
30.3.6	Product Subclass 6: Acyclic and Cyclic S,S-Acetal S-Oxides and S,S-Dioxides K. Ogura	
<hr/>		
30.3.6	Product Subclass 6: Acyclic and Cyclic S,S-Acetal S-Oxides and S,S-Dioxides	447
30.3.6.1	Synthesis of Product Subclass 6	447
30.3.6.1.1	Method 1: Substitution with Thiolate Anions	447
30.3.6.1.1.1	Variation 1: Substitution of α -Haloalkyl Sulfoxides	447
30.3.6.1.1.2	Variation 2: Substitution of α -Haloalkyl Sulfones	448
30.3.6.1.2	Method 2: Substitution of α -Haloalkyl Sulfides with Sulfur Nucleophiles	449
30.3.6.1.3	Method 3: Substitution of α -Acetoxyalkyl Sulfides with Sulfur Nucleophiles	450
30.3.6.1.4	Method 4: Reactions of α -Sulfanylated Carbanions	451
30.3.6.1.5	Method 5: Sulfanylation (Thiolation) Reactions of α -Sulfinyl Carbanions	453
30.3.6.1.6	Method 6: Sulfanylation (Thiolation) Reaction of α -Sulfonyl Carbanions	455
30.3.6.1.7	Method 7: Reactions of Sulfanyl(sulfinyl)methanes with Carbanions	458
30.3.6.1.8	Method 8: Reactions of α -Sulfanylated α -Sulfinylated Carbanions	461
30.3.6.1.8.1	Variation 1: Monoalkylation with Alkyl or Hetaryl Halides, Epoxides, or Enones	461
30.3.6.1.8.2	Variation 2: Dialkylation with Alkyl Halides	462
30.3.6.1.8.3	Variation 3: Condensations with Carbonyl Compounds	466
30.3.6.1.8.4	Variation 4: Acylation Reactions	468
30.3.6.1.8.5	Variation 5: Reactions with Nitriles	469
30.3.6.1.8.6	Variation 6: Addition of S,S-Acetal S-Oxides to Carbonyl Compounds	470
30.3.6.1.9	Method 9: Reactions of α -Sulfanyl α -Sulfonyl Carbanions	471
30.3.6.1.9.1	Variation 1: Monoalkylation with Alkyl Halides	471

30.3.6.1.9.2	Variation 2:	Dialkylation with Alkyl Halides	472
30.3.6.1.9.3	Variation 3:	Condensations with Carbonyl Compounds	474
30.3.6.1.9.4	Variation 4:	Acylation Reactions	475
30.3.6.1.9.5	Variation 5:	Addition to Carbonyl Compounds	476
30.3.6.1.10	Method 10:	Oxidation Reactions	479
30.3.6.1.10.1	Variation 1:	Oxidation of <i>S,S</i> -Acetals	479
30.3.6.1.10.2	Variation 2:	Oxidation of <i>S,S</i> -Acetal <i>S</i> -Oxides	483
30.3.6.1.10.3	Variation 3:	Oxidation of Ketene Dithioacetals	484
30.3.6.2	Applications of Product Subclass 6 in Organic Synthesis		485
30.3.6.2.1	Method 1:	Synthesis of Aldehydes	485
30.3.6.2.1.1	Variation 1:	Synthesis from <i>S,S</i> -Acetal <i>S</i> -Oxides	485
30.3.6.2.1.2	Variation 2:	Synthesis from <i>S,S</i> -Acetal <i>S,S</i> -Dioxides	487
30.3.6.2.2	Method 2:	Synthesis of Ketones	488
30.3.6.2.2.1	Variation 1:	Synthesis from <i>S,S</i> -Acetal <i>S</i> -Oxides	488
30.3.6.2.2.2	Variation 2:	Synthesis from <i>S,S</i> -Acetal <i>S,S</i> -Dioxides	489
30.3.6.2.3	Method 3:	Synthesis of Carboxylic Acid Derivatives	492
30.3.6.2.3.1	Variation 1:	Synthesis from <i>S,S</i> -Acetal <i>S</i> -Oxides	492
30.3.6.2.3.2	Variation 2:	Synthesis from <i>S,S</i> -Acetal <i>S,S</i> -Dioxides	495
30.3.6.2.4	Method 4:	Synthesis of α -Amino Acid Derivatives	496
30.3.6.2.5	Method 5:	Synthesis of α -Oxo Esters	498
30.3.7	Deprotection of <i>S,S</i>-Acetals		
	H. Firouzabadi and N. Iranpoor		
30.3.7	Deprotection of <i>S,S</i>-Acetals		505
30.3.7.1	Method 1:	Generation of Carbonyl Compounds by Oxidation of <i>S,S</i> -Acetals	505
30.3.7.1.1	Variation 1:	Using Molecular Oxygen Catalyzed by Bismuth(III) Nitrate or Trichlorooxovanadium(V)	506
30.3.7.1.2	Variation 2:	Using Periodic Acid	507
30.3.7.1.3	Variation 3:	Using 3-Chloroperoxybenzoic Acid/Trifluoroacetic Acid	508
30.3.7.1.4	Variation 4:	Using <i>tert</i> -Butyl Hydroperoxide in Aqueous Methanol	509
30.3.7.1.5	Variation 5:	Using Nitrogen Oxides	510
30.3.7.1.6	Variation 6:	Using Dinitrogen Tetroxide Complexes of Iron(III) and Copper(II) Nitrates	511
30.3.7.1.7	Variation 7:	Using [Bis(trifluoroacetoxy)iodo]benzene	512
30.3.7.1.8	Variation 8:	Using 2-Iodylbenzoic Acid	513
30.3.7.1.9	Variation 9:	Using Selenium Dioxide	514
30.3.7.1.10	Variation 10:	Using Solventless Microwave-Irradiated Ammonium Persulfate Supported on Wet Montmorillonite K 10 Clay	515
30.3.7.1.11	Variation 11:	Using Potassium Peroxymonosulfate (Oxone) on Wet Alumina	517
30.3.7.1.12	Variation 12:	Using Lead(IV) Oxide/Boron Trifluoride	518
30.3.7.1.13	Variation 13:	Using Dimethyl Sulfoxide	519
30.3.7.1.14	Variation 14:	Using Silica Chloride/Dimethyl Sulfoxide	521
30.3.7.1.15	Variation 15:	Using Bromotrimethylsilane or Iodotrimethylsilane in Dimethyl Sulfoxide	522

30.3.7.1.16	Variation 16:	Using <i>tert</i> -Butyl Bromide or <i>tert</i> -Butyl Iodide in Dimethyl Sulfoxide	522
30.3.7.1.17	Variation 17:	Using Molybdenum(V) Chloride/Dimethyl Sulfoxide	523
30.3.7.1.18	Variation 18:	Using Sodium Chlorite/Sodium Dihydrogen Phosphate	524
30.3.7.1.19	Variation 19:	Using Silica Chloride/Potassium Permanganate	525
30.3.7.1.20	Variation 20:	Using Zinc Dichromate Trihydrate	526
30.3.7.2	Method 2:	Lewis Acid Assisted Hydrolysis of <i>S,S</i> -Acetals	527
30.3.7.2.1	Variation 1:	Using Mercury(II) Chloride/Mercury(II) Oxide	527
30.3.7.2.2	Variation 2:	Using Mercury(II) Salts in the Presence of Calcium Carbonate or Collidine	528
30.3.7.2.3	Variation 3:	Using Red Mercury(II) Oxide/Boron Trifluoride	530
30.3.7.2.4	Variation 4:	Using Miscellaneous Lewis Acids	532
30.3.7.2.5	Variation 5:	Using Natural Kaolinitic Clay	535
30.3.7.3	Method 3:	Photochemical Reactions	536
30.3.7.3.1	Variation 1:	Using Methylene Green and Visible Light	537
30.3.7.3.2	Variation 2:	Using 2,4,6-Tris(4-chlorophenyl)pyrylium	538
30.3.7.3.3	Variation 3:	Using 2,3-Dichloro-5,6-dicyanobenzo-1,4-quinone and Visible Light	539
30.3.7.4	Method 4:	Using Supported Reagents	540
30.3.7.4.1	Variation 1:	Using Clay-Supported Ammonium Nitrate (Clayan)	540
30.3.7.4.2	Variation 2:	Using Clay-Supported Iron(III) Nitrate (Clayfen)	541
30.3.7.4.3	Variation 3:	Using Clay-Supported Copper(II) Nitrate Trihydrate (Claycop)	543
30.3.7.4.4	Variation 4:	Using In Situ Generated Clay-Supported Iron(III) Nitrate	543
30.3.7.4.5	Variation 5:	Using Iron(III) Nitrate Nonahydrate/Silica Gel	544
30.3.7.5	Method 5:	Reaction with Alkylating Agents	545
30.3.7.5.1	Variation 1:	Using Iodomethane	545
30.3.7.5.2	Variation 2:	Using Triethyloxonium Tetrafluoroborate	549
30.3.7.5.3	Variation 3:	Using Methyl Fluorosulfonate	551
30.3.7.6	Method 6:	Reaction with Electrophilic Reagents	551
30.3.7.6.1	Variation 1:	Using <i>N</i> -Halosuccinimides	551
30.3.7.6.2	Variation 2:	Using <i>N</i> -Halosuccinimide/Silver(I) Salts	552
30.3.7.6.3	Variation 3:	Using Trichloroisocyanuric Acid/Silver(I) Nitrate	554
30.3.7.6.4	Variation 4:	Using Electrophilic Halogens/Dimethyl Sulfoxide	554
30.3.7.6.5	Variation 5:	Using Ammonium and Phosphonium Tribromide Salts	556
30.3.7.6.6	Variation 6:	Using Selectfluor	557
30.3.7.6.7	Variation 7:	Using Bromodimethylsulfonium Bromide	558
30.3.7.6.8	Variation 8:	Using Hydrochloric Acid/Hydrogen Peroxide	558
30.3.7.6.9	Variation 9:	Using Electrophilic Nitrosonium or Nitronium Ions	559
30.3.7.6.10	Variation 10:	Using Sodium Nitrite/Acetyl Chloride	562
30.3.7.6.11	Variation 11:	Using Silver(I) Nitrite/Iodine	563
30.3.7.6.12	Variation 12:	Using Sulfuryl Chloride Fluoride	564
30.3.7.6.13	Variation 13:	Using Methylbis(methylsulfanyl)sulfonium Hexachloroantimonate	565
30.3.7.6.14	Variation 14:	Using Benzeneseleninic Anhydride	566
30.3.7.6.15	Variation 15:	Using Tantalum(V) Chloride Catalyzed Oxidation of Iodide	567
30.3.7.6.16	Variation 16:	Using Oxone/Potassium Bromide in Aqueous Acetonitrile	567
30.3.7.7	Method 7:	Reaction with Single-Electron-Transfer Agents	568
30.3.7.7.1	Variation 1:	Using 2,3-Dichloro-5,6-dicyanobenzo-1,4-quinone	568

30.3.7.7.2	Variation 2:	Using <i>N</i> -Fluoro-2,4,6-trimethylpyridinium Trifluoromethanesulfonate/Water	569
30.3.7.7.3	Variation 3:	Using an Iron(III) Phenanthroline Complex	570
30.3.7.7.4	Variation 4:	Using Antimony(V) Chloride	571
30.3.7.7.5	Variation 5:	Using Ammonium Cerium(IV) Nitrate	572
30.3.7.8	Method 8:	Reaction with Brønsted Acids	573
30.3.7.8.1	Variation 1:	Using Sulfuric Acid	573
30.3.7.8.2	Variation 2:	Using Amberlyst 15/Dowex-50W and Paraformaldehyde	574
30.3.7.9	Method 9:	Electrochemical Oxidation	576
30.3.7.9.1	Variation 1:	Direct Electrochemical Oxidation	576
30.3.7.9.2	Variation 2:	Indirect Electrochemical Oxidation	579
30.3.7.10	Methods 10:	Miscellaneous Methods	579
30.3.7.10.1	Variation 1:	Using 4-Nitrobenzaldehyde/Trimethylsilyl Trifluoromethanesulfonate	580
30.3.7.10.2	Variation 2:	Using Phenyl Dichlorophosphate/Sodium Iodide	580
30.3.7.10.3	Variation 3:	Using Zirconium Sulfophenyl Phosphonate	581

30.4 Product Class 4: *S,N*-Acetals (α -Amino Sulfur Derivatives)

C. Kibayashi and N. Yamazaki

30.4	Product Class 4: <i>S,N</i>-Acetals (α-Amino Sulfur Derivatives)	587
30.4.1	Synthesis of Product Class 4	587
30.4.1.1	Method 1: <i>S,N</i> -Acetalization of Carbonyl Compounds	587
30.4.1.2	Method 2: Sulfanylmethylation of Secondary Amines	588
30.4.1.3	Method 3: Phenylsulfanylmethylation of Carbazole	589
30.4.1.4	Method 4: Reduction of [(Alkylsulfanyl)methylene]iminium Salts	589
30.4.1.5	Method 5: Condensation of <i>N</i> -(Hydroxymethyl)amides with Thiols	589
30.4.1.6	Method 6: Nucleophilic Substitution of the Methoxy Group of <i>O,N</i> -Acetals by Thiols	590
30.4.1.7	Method 7: Reaction of 2,3-Dihydrobenzothiazole-2-thione with Grignard Reagents and Organolithiums	591
30.4.1.8	Method 8: 1,3-Dipolar Cycloaddition of an Azomethine Ylide with Thiobenzophenone	591
30.4.2	Applications of Product Class 4 in Organic Synthesis	592
30.4.2.1	Method 1: Reaction with Grignard Reagents	592
30.4.2.2	Method 2: Reaction with Organolithium Reagents	592
30.4.2.3	Method 3: Alkylation of <i>N</i> -[(Phenylsulfanyl)methyl]carbazole	593
30.4.2.4	Method 4: Addition to Benzaldehyde	593
30.4.2.5	Method 5: Rhodium-Catalyzed Carbonylation	594

30.5	Product Class 5: Selenium- and Tellurium-Containing Acetals T. Murai and M. Yoshimatsu	
30.5	Product Class 5: Selenium- and Tellurium-Containing Acetals	597
30.5.1	Product Subclass 1: S,Se- and S,Te-Acetals	597
30.5.1.1	Synthesis of Product Subclass 1	597
30.5.1.1.1	Method 1: Sulfanylation of α -(Organoselanyl)methyl lithium Reagents	597
30.5.1.1.2	Method 2: Selanylation of α -Chloromethyl Sulfides	599
30.5.1.1.3	Method 3: Reaction of Alkyneselenolates or S-Alkyl Selenothioacetates with Electrophiles	599
30.5.1.2	Applications of Product Subclass 1 in Organic Synthesis	601
30.5.2	Product Subclass 2: Se,Se- and Se,Te-Acetals	602
30.5.2.1	Synthesis of Product Subclass 2	602
30.5.2.1.1	Method 1: Diselanylation of Dihaloalkanes	602
30.5.2.1.2	Method 2: Selenoacetalization of Aldehydes and Ketones with Organoselenols	604
30.5.2.1.2.1	Variation 1: Acid-Mediated Selenoacetalization	604
30.5.2.1.2.2	Variation 2: Selenoacetalization with Selenium-Containing Reagents	609
30.5.2.1.3	Method 3: Reaction of Diazo Compounds with Diorgano Diselenides or Diphenyl Selenatelluride	611
30.5.2.1.4	Method 4: Addition of Butyllithium to Vinyl Selenides Followed by Selanylation	612
30.5.2.1.5	Method 5: Alkylation of Bis(organoselanyl)alkylmetals	613
30.5.2.1.6	Method 6: Reaction of Bis(organoselanyl)methyl Carbenium Ions with Soft Nucleophiles	618
30.5.2.2	Applications of Product Subclass 2 in Organic Synthesis	619
30.5.3	Product Subclass 3: Te,Te-Acetals	629
30.5.3.1	Synthesis of Product Subclass 3	629
30.5.3.1.1	Method 1: Ditellanylation of Dihaloalkanes	629
30.5.3.1.2	Method 2: Reaction of Aluminum Tellurolates with Acetals	630
30.5.3.1.3	Method 3: Reaction of Diazomethane with Diorgano Ditellurides	630
30.5.3.1.4	Method 4: Alkylation of Bis(organotellanyl)methyl lithium	630
30.5.3.1.5	Method 5: Halogenation of Bis(organotellanyl)methanes	631
30.5.4	Product Subclass 4: Se,N- and Se,P-Acetals	631
30.5.4.1	Synthesis of Product Subclass 4	631
30.5.4.1.1	Method 1: Phosphinomethylation of Benzeneselenenyl Chloride	631
30.5.4.1.2	Method 2: Aminomethylation of Benzeneselenol	632
30.5.4.1.3	Method 3: Organoselanylation of O,N-Acetals	633
30.5.4.1.4	Method 4: Alkylselanylation of N,N-Acetals	633
30.5.5	Product Subclass 5: Te,N- and Te,P-Acetals	634
30.5.5.1	Synthesis of Product Subclass 5	634
30.5.5.1.1	Method 1: Aminomethylation of Sodium Hydrogen Telluride	634

30.6	Product Class 6: <i>N,N</i>-Acetals C. Kibayashi and N. Yamazaki	
<hr/>		
30.6	Product Class 6: <i>N,N</i>-Acetals	639
30.6.1	Synthesis of Product Class 6	639
30.6.1.1	Method 1: Reaction of Methyl (Benzoylamino)bromoacetate with Methyl L-Valinate	639
30.6.1.2	Method 2: <i>N,N</i> -Acetalization of Aldehydes	640
30.6.1.3	Method 3: Condensation of L-Asparagine with Pivalaldehyde	640
30.6.1.4	Method 4: Reaction of <i>O,N</i> -Acetals with Amines	641
30.6.1.5	Method 5: Cyclization of Imines	642
30.6.1.6	Method 6: Treatment of (3 <i>R</i> ,5 <i>S</i> ,8 <i>aR</i>)-3-Phenylhexahydro-5 <i>H</i> -[1,3]- oxazolo[3,2- <i>a</i>]pyridine-5-carbonitrile with Phenyllithium	643
30.6.1.7	Method 7: Reaction of 3-Bromo-3-phenyl-3 <i>H</i> -diazirine with Secondary Amines	643
30.6.2	Applications of Product Class 6 in Organic Synthesis	644
30.6.2.1	Method 1: Aminomethylation of Aryl-Substituted Alkenes	644
30.6.2.2	Method 2: Aminomethylation of Alkynes	645
30.6.2.3	Method 3: Rhodium-Catalyzed Reaction with Diethyl(methyl)silane and Carbon Monoxide	645
30.6.2.4	Method 4: Enantioselective Synthesis of α -Substituted β -Amino Acids	646
30.7	Product Class 7: <i>N,P</i>- and <i>P,P</i>-Acetals M. Yamashita	
<hr/>		
30.7	Product Class 7: <i>N,P</i>- and <i>P,P</i>-Acetals	649
30.7.1	Product Subclass 1: <i>N,P</i>-Acetals	649
30.7.1.1	Synthesis of Product Subclass 1	649
30.7.1.1.1	Method 1: Addition of P–H Compounds to Aldehydes or Ketones in the Presence of Amines, or to Imines	649
30.7.1.1.2	Method 2: Substitution Reaction of α,β -Epoxides with Amines	662
30.7.1.1.3	Method 3: Synthesis from <i>O,P</i> -Acetals	663
30.7.1.1.4	Method 4: Synthesis from <i>O,N</i> -Acetals	664
30.7.1.1.5	Method 5: Synthesis from <i>O,P</i> -Acetals	664
30.7.1.1.6	Method 6: Synthesis from Other <i>N,P</i> -Acetals	664
30.7.1.1.7	Methods 7: Miscellaneous Methods	666
30.7.2	Product Subclass 2: <i>P,P</i>-Acetals	668
30.7.2.1	Synthesis of Product Subclass 2	669
30.7.2.1.1	Method 1: Addition of P–H Compounds to Acylphosphorus Compounds	669
30.7.2.1.2	Method 2: Substitution Reactions of α -Haloalkylphosphorus and Related Compounds with Phosphorus Anions or Phosphites (Michaelis–Arbuzov Reaction)	671
30.7.2.1.3	Method 3: Substitution Reaction of α,β -Epoxyalkylphosphorus Compounds with Phosphorus Anions	672

30.7.2.1.4	Method 4:	Phosphorylation of Lithiated α -Anions of Alkylphosphonates	673
30.7.2.1.5	Method 5:	Addition of P—H Compounds to Vinylphosphorus Compounds	674
30.7.2.1.6	Method 6:	Michael-Type Addition of Nucleophiles to Alk-1-ene-1,1-diylbisphosphonates	674
30.7.2.1.7	Method 7:	Alkylation of Alkane-1,1-diylbisphosphonates	675
