8.1	Product Class 1: Lithium Compounds	
	M. Majewski and V. Snieckus	5
8.1.1	Product Subclass 1: Lithium Metal	
	R. K. Dieter	43
8.1.2	Product Subclass 2: Lithium Hydride	
	U. Wietelmann	133
8.1.3	Product Subclass 3: Lithium Halides, Lithium Cyanide, and Related Salts	
	U. Wietelmann	139
8.1.4	Product Subclass 4: Lithium–Oxygen Compounds	
	U. Wietelmann	165
8.1.5	Product Subclass 5: Lithium–Sulfur, –Selenium, and –Tellurium Compounds	
	U. Wietelmann	171
8.1.6	Product Subclass 6: Lithium Amides	
	J. Eames	173
8.1.7	Product Subclass 7: Alkylolithium and Cycloalkylolithium Compounds	
	L. Brandsma and J. W. Zwikker	243
8.1.8	Product Subclass 8: Alkenyllithium Compounds	
	L. Brandsma and J. W. Zwikker	253
8.1.9	Product Subclass 9: Allenyllithium Compounds	
	L. Brandsma and J. W. Zwikker	271
8.1.10	Product Subclass 10: Lithium Acetylides	
	L. Brandsma and J. W. Zwikker	285

8.1.11	Product Subclass 11: Lithium Alkynolates, Alkynethiolates, and Alkyneselenolates L. Brandsma and J. W. Zwikker	305
8.1.12	Product Subclass 12: Allyllithium Compounds L. Brandsma and J. W. Zwikker	313
8.1.13	Product Subclass 13: Benzylolithium Compounds and (Lithiomethyl)hetarenes J. N. Reed	329
8.1.14	Product Subclass 14: Aryllithium and Hetaryllithium Compounds G. W. Gribble	357
8.1.15	Product Subclass 15: α-Lithiocarboxylic Acids and Related Lithium Compounds (Including Enolates) J. R. Green	427
8.1.16	Product Subclass 16: β-Lithiocarboxylic Acids and Related Lithium Compounds D. Caine	487
8.1.17	Product Subclass 17: α-Lithio Aldehydes, α-Lithio Ketones, and Related Compounds D. Caine	499
8.1.18	Product Subclass 18: β-Lithio Aldehydes, β-Lithio Ketones, and Related Compounds D. Caine	619
8.1.19	Product Subclass 19: sp^3-Hybridized α-Lithio Ethers and O-Carbamates S. MacNeil	637
8.1.20	Product Subclass 20: α-Lithio Sulfoxides T. Durst and M. Khodaei	661
8.1.21	Product Subclass 21: α-Lithioamines R. E. Gawley, S. O'Connor, and R. Klein	677
8.1.22	Product Subclass 22: Lithium Nitronates N. Ono	759
8.1.23	Product Subclass 23: γ-Lithio Ethers and Related Compounds D. Caine	775
8.1.24	Product Subclass 24: Carbamoyllithium and Trihalomethylithium Compounds C. Metallinos	795

8.1.25	Product Subclass 25: Tris(organo­sulfanyl)- and Tris(organo­selanyl)methyl­lithium Compounds	
	C. Nájera and M. Yus	805
8.1.26	Product Subclass 26: Bis(organo­sulfanyl)- and Bis(organo­selanyl)methyl­lithium Compounds	
	C. Nájera and M. Yus	813
8.1.27	Product Subclass 27: α-Lithio Vinyl Ethers	
	R. W. Friesen and C. F. Sturino	841

Introduction

M. Majewski and V. Snieckus

Introduction	1
---------------------------	---

8.1 Product Class 1: Lithium Compounds

M. Majewski and V. Snieckus

8.1 Product Class 1: Lithium Compounds	5
---	---

8.1.1 Product Subclass 1: Lithium Metal

R. K. Dieter

8.1.1 Product Subclass 1: Lithium Metal	43
--	----

Applications of Product Subclass 1 in Organic Synthesis	44
---	----

8.1.1.1 Method 1: Synthesis of C—Li or Si—Li Groups and Their Reactions with Carbon Electrophiles	44
--	----

8.1.1.1.1 Variation 1: Reductive Halogen–Metal Exchange	44
--	----

8.1.1.1.2 Variation 2: Reductive Metalation of Carbon–Chalcogen and C—N Bonds	55
--	----

8.1.1.1.3 Variation 3: Reductive Metalation of Aryl C—H, Diarylmethylene C—H, Terminal Alkyne C—H, Vinyl C—H, C=C, and Strained C—C Bonds	65
--	----

8.1.1.2 Method 2: Synthesis of the C—Li Bond Followed by Protonation, Coupling, or Elimination	67
---	----

8.1.1.2.1 Variation 1: From Carbon–Heteroatom and Selected C—C Bonds	67
---	----

8.1.1.2.2 Variation 2: Birch Reductions	83
--	----

8.1.1.2.3 Variation 3: Heteroaromatic Birch Reductions	96
---	----

8.1.1.2.4 Variation 4: Styrenes, 1,3-Dienes, and Alkynes	101
---	-----

8.1.1.3 Method 3: Synthesis of X—Li Bonds (X = O, N, S, P)	107
---	-----

8.1.1.3.1 Variation 1: Reductive Metalation of Alcohols, Amines, Thiols, Phosphines, and X—X Bonds	107
---	-----

8.1.1.3.2 Variation 2: Reduction of C=O and C=N Bonds	109
--	-----

8.1.1.3.3 Variation 3: Reduction of π -, Strained C—C, or C—X Bonds α to a Carbonyl Group	113
---	-----

8.1.2	Product Subclass 2: Lithium Hydride	
	U. Wietelmann	
<hr/>		
8.1.2	Product Subclass 2: Lithium Hydride	133
	Applications of Product Subclass 2 in Organic Synthesis	133
8.1.2.1	Method 1: Reactions as a Base	133
8.1.2.2	Method 2: Superactive Lithium Hydride	134
8.1.2.3	Method 3: Other Lithium Hydride Activation Methods	135
8.1.3	Product Subclass 3: Lithium Halides, Lithium Cyanide, and Related Salts	
	U. Wietelmann	
<hr/>		
8.1.3	Product Subclass 3: Lithium Halides, Lithium Cyanide, and Related Salts	139
	Applications of Product Subclass 3 in Organic Synthesis	139
8.1.3.1	Method 1: Organic Salt Solutions as Reaction Media	139
8.1.3.2	Method 2: Effects on Main Group Organometallic Chemistry	140
8.1.3.2.1	Variation 1: Salt Effects in Enolate and Similar Chemistry	141
8.1.3.2.2	Variation 2: Protonation of Enolates	144
8.1.3.2.3	Variation 3: Lithium Salt Effects in Grignard Chemistry	145
8.1.3.3	Method 3: Effects on Transition-Metal Chemistry	146
8.1.3.3.1	Variation 1: Palladium-Catalyzed Reactions	147
8.1.3.3.2	Variation 2: Organocopper Reactions	148
8.1.3.3.3	Variation 3: Reactions of Other Transition Metals	149
8.1.3.4	Method 4: Addition Reactions	149
8.1.3.4.1	Variation 1: Cycloaddition Reactions	149
8.1.3.4.2	Variation 2: Addition to Carbonyl Compounds	151
8.1.3.4.3	Variation 3: Miscellaneous Additions	153
8.1.3.5	Method 5: Single-Bond Cleavage Reactions	153
8.1.3.6	Method 6: Condensation Reactions	156
8.1.3.7	Method 7: Elimination Reactions	158
8.1.3.8	Method 8: Hydride Reductions	158
8.1.3.9	Method 9: Lithium Salts as Sources for Halogens or Cyanide	159
8.1.4	Product Subclass 4: Lithium–Oxygen Compounds	
	U. Wietelmann	
<hr/>		
8.1.4	Product Subclass 4: Lithium–Oxygen Compounds	165
	Applications of Product Subclass 4 in Organic Synthesis	165
8.1.4.1	Method 1: Reactions Using Lithium Hydroxide	165
8.1.4.2	Method 2: Reactions Using Lithium Carbonate	166
8.1.4.3	Method 3: Use of Lithium Hydroperoxide and Related Reagents	166
8.1.4.4	Method 4: Reactions Using Lithium Acetate	167
8.1.4.5	Method 5: Reactions Using Lithium Alkoxides	168
8.1.4.5.1	Variation 1: Elimination and Condensation Reactions	168
8.1.4.5.2	Variation 2: Oxidation Reactions with Copper(II) Bromide–Lithium <i>tert</i> -Butoxide	169

8.1.5	Product Subclass 5: Lithium–Sulfur, –Selenium, and –Tellurium Compounds U. Wietelmann	
<hr/>		
8.1.5	Product Subclass 5: Lithium–Sulfur, –Selenium, and –Tellurium Compounds	171
	Applications of Product Subclass 5 in Organic Synthesis	171
8.1.6	Product Subclass 6: Lithium Amides J. Eames	
<hr/>		
8.1.6	Product Subclass 6: Lithium Amides	173
	Synthesis of Product Subclass 6	174
8.1.6.1	Method 1: Lithium Amide	174
8.1.6.2	Method 2: Lithium Ethylamide	175
8.1.6.3	Method 3: Lithium Pyrrolidide	175
8.1.6.4	Method 4: Lithium Diethylamide	177
8.1.6.5	Method 5: Lithium Dicyclohexylamide	178
8.1.6.6	Method 6: Lithium Diisopropylamide	179
8.1.6.6.1	Variation 1: By Deprotonation of Diisopropylamine by Butyllithium	180
8.1.6.6.2	Variation 2: By Reaction of Diisopropylamine with Lithium	180
8.1.6.7	Method 7: Lithium 2,2,6,6-Tetramethylpiperidide	181
8.1.6.8	Method 8: Lithium Isopropylcyclohexylamide	182
8.1.6.9	Method 9: Lithium 3-Aminopropylamide	183
8.1.6.10	Method 10: Lithium Hexamethyldisilazane	184
8.1.6.11	Method 11: Lithium Benzyl(trimethylsilyl)amide	184
8.1.6.12	Method 12: Tetradentate Chiral Lithium Amides	185
8.1.6.13	Method 13: Lithium (<i>R</i>)-(1-Phenylethyl)(2,2,2-trifluoroethyl)amide	187
8.1.6.14	Method 14: Lithium (3 <i>S</i>)-3-(1-Piperidylmethyl)-1,2,3,4-tetrahydro- isoquinolin-2-ide	188
8.1.6.15	Method 15: Lithium (<i>S</i>)-Benzyl(1-phenylethyl)amide	190
8.1.6.16	Method 16: The Dilithium Salt of 1-(Methylamino)-1-phenylpropan-2-ol	190
8.1.6.17	Method 17: Lithium Methyl[(1 <i>R</i> ,2 <i>S</i>)-1-phenyl-2-pyrrolidin- 1-ylpropyl]amide	191
8.1.6.18	Method 18: Lithium (1 <i>S</i> ,2 <i>S</i>)-1,2-Diphenyl- <i>N,N'</i> -bis[(1 <i>R</i>)-1-phenylethyl]- ethane-1,2-diamide	193
8.1.6.19	Method 19: Lithium Bis[(<i>S</i>)-1-phenylethyl]amide	194
8.1.6.20	Method 20: Lithium (<i>S</i>)-2-(Pyrrolidin-1-ylmethyl)pyrrolidide	194
8.1.6.21	Method 21: Lithium (2 <i>S</i> ,3 <i>aS</i> ,7 <i>aS</i>)-2-(Pyrrolidin-1-ylmethyl)octahydro- 1 <i>H</i> -indol-1-ide	194
8.1.6.22	Method 22: Lithium (1 <i>R</i> ,2 <i>R</i>)- <i>N,N'</i> -Bis(2-methoxyethyl)cyclohexane- 1,2-diamide	197
8.1.6.23	Method 23: The Lithium Salt of (1 <i>S</i> ,3 <i>R</i> ,4 <i>R</i>)-3-(Pyrrolidin-1-ylmethyl)- 2-azabicyclo[2.2.1]heptane	198
8.1.6.24	Method 24: Lithium (<i>S</i>)-Benzyl[2-(4-methylpiperazin-1-yl)- 1-phenylethyl]amide	201

8.1.6.25	Method 25:	Lithium (<i>S</i>)-(Diphenylmethyl)(1-benzylpyrrolidin-3-yl)amide	203
		Applications of Product Subclass 6 in Organic Synthesis	204
8.1.6.26	Method 26:	Deprotonation of Carbonyl Compounds To Give Lithium Enolates	204
8.1.6.27	Method 27:	Enantioselective Deprotonation of Ketones by Chiral Lithium Amides	208
8.1.6.28	Method 28:	Deprotonation of Ketones by Lithium Hexamethyldisilazane in the Synthesis of Diazo Ketones	214
8.1.6.29	Method 29:	Deprotonation of Terminal Alkynes by Lithium Amide	215
8.1.6.30	Method 30:	Deprotonation of an Epoxide by Lithium Diethylamide	216
8.1.6.31	Method 31:	Desymmetrization of <i>meso</i> -Epoxides by Deprotonation by Lithium Amides	217
8.1.6.32	Method 32:	Kinetic Resolution of Racemic Epoxides by Deprotonation by Lithium Amides	221
8.1.6.33	Method 33:	Isomerization of an Epoxide to an Allylic Alcohol by Deprotonation by Lithium Diethylamide	221
8.1.6.34	Method 34:	Deprotonation of a Nitrile by Lithium Diisopropylamide	222
8.1.6.35	Method 35:	Carbene Formation by Deprotonation Reactions of Lithium Amides	223
8.1.6.36	Method 36:	Desymmetrization of an Amide by Deprotonation Using Lithium Amides	224
8.1.6.37	Method 37:	Desymmetrization of a <i>meso</i> -Phospholane Oxide by Deprotonation by a Lithium Amide	225
8.1.6.38	Method 38:	Nucleophilic Addition Involving Lithium Amides	227
8.1.6.38.1	Variation 1:	Nucleophilic Addition Involving Lithium Diisopropylamide	227
8.1.6.38.2	Variation 2:	Diastereoselective Conjugate Addition with Lithium Benzyl(1-phenylethyl)amide	228
8.1.6.39	Method 39:	Hydride Transfer Involving Lithium Amides	230
8.1.6.39.1	Variation 1:	Hydride Transfer by Lithium Diisopropylamide	230
8.1.6.39.2	Variation 2:	Hydride Transfer by Lithium (<i>S</i>)-Benzyl[2-(4-methylpiperazin-1-yl)-1-phenylethyl]amide	231
8.1.6.40	Method 40:	Additional Applications of Chiral Lithium Amides	231
8.1.6.40.1	Variation 1:	Enantioselective Addition of Butyllithium Mediated by a Chiral Lithium Amide	231
8.1.6.40.2	Variation 2:	Enantioselective Protonation of a Prostereogenic Enolate	232
8.1.7	Product Subclass 7: Alkylolithium and Cycloalkylolithium Compounds		
	L. Brandsma and J. W. Zwikker		
8.1.7	Product Subclass 7: Alkylolithium and Cycloalkylolithium Compounds		
	Synthesis of Product Subclass 7		
8.1.7.1	Method 1:	Reaction of Halogenides with Lithium	244
8.1.7.2	Method 2:	Halogen–Lithium Exchange	246
8.1.7.3	Method 3:	Deprotonation	246
8.1.7.4	Methods 4:	Additional Methods	247

	Applications of Product Subclass 7 in Organic Synthesis	247
8.1.7.5	Method 5: Replacement of Lithium by Other Metals	247
8.1.7.6	Method 6: Addition of Alkylolithium to Unsaturated Carbon Compounds (Carbolithiation)	248
8.1.7.6.1	Variation 1: Cyclization of Unsaturated Lithium Compounds (Cyclocarbolithiation)	249
8.1.8	Product Subclass 8: Alkenyllithium Compounds	
	L. Brandsma and J. W. Zwikker	
8.1.8	Product Subclass 8: Alkenyllithium Compounds	253
	Synthesis of Product Subclass 8	253
8.1.8.1	Method 1: Deprotonation	253
8.1.8.1.1	Variation 1: Deprotonation with Alkylolithium Reagents	254
8.1.8.1.2	Variation 2: Deprotonation with Superbasic Reagents	256
8.1.8.1.3	Variation 3: Deprotonation with Lithium Dialkylamides	257
8.1.8.2	Method 2: Halogen–Metal Exchange Using Alkylolithium Reagents	259
8.1.8.3	Method 3: Reaction of Alkenyl Halides with Lithium	261
8.1.8.4	Method 4: Tin–Lithium Exchange	262
8.1.8.5	Method 5: Reaction of (Arylsulfonyl)hydrazones with Alkylolithium Reagents (Shapiro Reaction)	263
8.1.8.6	Methods 6: Additional Methods	264
	Applications of Product Subclass 8 in Organic Synthesis	265
8.1.8.7	Method 7: Replacement of Lithium by Other Metals	265
8.1.8.8	Method 8: Formation of C–C Bonds	266
8.1.8.8.1	Variation 1: Reaction with Heterocumulenes	266
8.1.8.8.2	Variation 2: Acylation Reactions	266
8.1.8.8.3	Variation 3: Alkylation and Related Reactions	267
8.1.8.8.4	Variations 4: Additional Reactions	268
8.1.9	Product Subclass 9: Allenyllithium Compounds	
	L. Brandsma and J. W. Zwikker	
8.1.9	Product Subclass 9: Allenyllithium Compounds	271
	Synthesis of Product Subclass 9	272
8.1.9.1	Method 1: Deprotonation of Allenes with Butyllithium	272
8.1.9.1.1	Variation 1: Deprotonation of Allenes with Lithium Amides	273
8.1.9.2	Method 2: Metalation of Alkynes with Butyllithium	274
8.1.9.3	Method 3: Metalation of Alkynes with Butyllithium– <i>N,N,N',N'</i> -Tetramethylethylenediamine	276
8.1.9.4	Method 4: Metalation of Alkynes with Butyllithium–Potassium <i>tert</i> -Butoxide Followed by Addition of Lithium Bromide	277
8.1.9.5	Method 5: 1,4-Addition of Lithium Compounds to Enynes	278
	Applications of Product Subclass 9 in Organic Synthesis	278

8.1.9.6	Method 6:	Replacement of Lithium by Other Metals	278
8.1.9.7	Method 7:	Formation of C—C Bonds	279
8.1.9.7.1	Variation 1:	Reactions with Heterocumulenes	279
8.1.9.7.2	Variation 2:	Reactions with Acylating Agents	279
8.1.9.7.3	Variation 3:	Reactions with Aldehydes and Ketones	280
8.1.9.7.4	Variation 4:	Reaction with Alkylating Agents	280
8.1.9.8	Methods 8:	Additional Methods	281
8.1.10	Product Subclass 10: Lithium Acetylides		
	L. Brandsma and J. W. Zwikker		
8.1.10	Product Subclass 10: Lithium Acetylides		285
	Synthesis of Product Subclass 10		287
8.1.10.1	Method 1:	Metalation with Lithium in Liquid Ammonia	287
8.1.10.2	Method 2:	Metalation with Lithium Amide in Liquid Ammonia	287
8.1.10.2.1	Variation 1:	Dehydrohalogenation with Lithium Amide	288
8.1.10.3	Method 3:	Metalation with Lithium Dialkylamides	288
8.1.10.3.1	Variation 1:	Elimination Reactions with Lithium Dialkylamides	289
8.1.10.4	Method 4:	Metalation with Alkylolithium Reagents	289
8.1.10.5	Method 5:	Dehalogenation with Alkylolithium Reagents	290
8.1.10.6	Method 6:	Rearrangement of Terminally Lithiated Allenes	291
8.1.10.7	Methods 7:	Additional Methods	291
	Applications of Product Subclass 10 in Organic Synthesis		292
8.1.10.8	Method 8:	Replacement of Lithium by Other Metals	292
8.1.10.9	Method 9:	Formation of C—C Bonds	292
8.1.10.9.1	Variation 1:	Reactions with Heterocumulenes	292
8.1.10.9.2	Variation 2:	Acylation Reactions	294
8.1.10.9.3	Variation 3:	Reactions with Aldehydes and Ketones	296
8.1.10.9.4	Variation 4:	Reaction with Cyanogen Chloride	297
8.1.10.9.5	Variation 5:	Reactions with Alkylating Agents	297
8.1.10.10	Method 10:	Formation of Carbon—Heteroatom Bonds	299
8.1.10.10.1	Variation 1:	Reaction with Halogenating Agents	299
8.1.10.10.2	Variation 2:	Sulfanylation, Sulfinylation, and Related Reactions	301
8.1.10.10.3	Variation 3:	Silylation and Stannylation	302
8.1.11	Product Subclass 11: Lithium Alkynolates, Alkynethiolates, and Alkyneselenolates		
	L. Brandsma and J. W. Zwikker		
8.1.11	Product Subclass 11: Lithium Alkynolates, Alkynethiolates, and Alkyneselenolates		305
	Synthesis of Product Subclass 11		305
8.1.11.1	Method 1:	Insertion of Elements	305
8.1.11.2	Method 2:	Lithium Alkynolates by Cyclofragmentation of Heterocycles	306
8.1.11.3	Method 3:	Lithium Alkynethiolates from 1,2,3-Thiadiazoles	307

8.1.11.4	Method 4: Lithium Alkynolates from α,α -Dibromo or α -Halo Ketones	307
8.1.11.5	Methods 5: Additional Methods	307
	Applications of Product Subclass 11 in Organic Synthesis	308
8.1.11.6	Method 6: Functionalization of Lithium Alkynolates	308
8.1.11.7	Method 7: Functionalization of Lithium Alkynethiolates and Alkyneselenolates	309
8.1.11.8	Method 8: Protonation–Addition Reactions with Lithium Alkynolates	310
8.1.11.9	Method 9: Protonation–Addition Reactions with Lithium Alkynethiolates	310
8.1.12	Product Subclass 12: Allyllithium Compounds L. Brandsma and J. W. Zwikker	
8.1.12	Product Subclass 12: Allyllithium Compounds	313
	Synthesis of Product Subclass 12	314
8.1.12.1	Method 1: Deprotonation	314
8.1.12.1.1	Variation 1: Deprotonation with Allyllithium Reagents	315
8.1.12.1.2	Variation 2: Deprotonation Using the Superbase Butyllithium–Potassium <i>tert</i> -Butoxide	317
8.1.12.1.3	Variation 3: Lithiation with Lithium Dialkylamides	320
8.1.12.2	Methods 2: Additional Methods	321
	Applications of Product Subclass 12 in Organic Synthesis	321
8.1.12.3	Method 3: Replacement of Lithium by Other Metals	321
8.1.12.4	Method 4: Formation of C–C Bonds	322
8.1.12.4.1	Variation 1: Reactions with Heterocumulenes	322
8.1.12.4.2	Variation 2: Reactions with Alkylating Agents	323
8.1.12.4.3	Variation 3: Reactions with Carbonyl Compounds	324
8.1.12.5	Method 5: Formation of Carbon–Heteroatom Bonds	325
8.1.13	Product Subclass 13: Benzylithium Compounds and (Lithiomethyl)hetarenes J. N. Reed	
8.1.13	Product Subclass 13: Benzylithium Compounds and (Lithiomethyl)hetarenes	329
	Synthesis of Product Subclass 13	329
8.1.13.1	Method 1: Deprotonation of Benzylic Carbons	329
8.1.13.1.1	Variation 1: Of Unactivated Benzylic Carbons	330
8.1.13.1.2	Variation 2: Of Benzylic Carbons Activated by an α -Substituent	331
8.1.13.1.3	Variation 3: Heteroatom-Facilitated Lateral Lithiation	336
8.1.13.2	Method 2: Heteroatom–Lithium Exchange	342
8.1.13.2.1	Variation 1: Tin–Lithium Exchange	342
8.1.13.2.2	Variation 2: Selenium–Lithium Exchange	345
8.1.13.3	Method 3: Reductive Lithiation	347
8.1.13.3.1	Variation 1: Using Lithium Metal and Naphthalene	347
8.1.13.3.2	Variation 2: Using Lithium Metal and 4,4'-Di- <i>tert</i> -butylbiphenyl	348

8.1.13.4	Method 4:	Carbolithiation	350
8.1.13.4.1	Variation 1:	Of Alkenes	350
8.1.13.4.2	Variation 2:	Of Alkynes	353
8.1.14	Product Subclass 14: Aryllithium and Hetaryllithium Compounds		
	G. W. Gribble		
8.1.14	Product Subclass 14: Aryllithium and Hetaryllithium Compounds 357		
	Synthesis of Product Subclass 14 357		
8.1.14.1	Method 1:	Aryllithium Compounds by Halogen–Lithium Exchange	357
8.1.14.1.1	Variation 1:	From Aryl Fluorides	358
8.1.14.1.2	Variation 2:	From Aryl Chlorides	358
8.1.14.1.3	Variation 3:	From Aryl Bromides	359
8.1.14.1.4	Variation 4:	From Aryl Iodides	361
8.1.14.2	Method 2:	Aryllithium Compounds by Directed <i>ortho</i> -Lithiation	361
8.1.14.2.1	Variation 1:	Amine Directed <i>ortho</i> -Lithiation Groups	362
8.1.14.2.2	Variation 2:	Amide Directed <i>ortho</i> -Lithiation Groups	364
8.1.14.2.3	Variation 3:	Alkoxy Directed <i>ortho</i> -Lithiation Groups	365
8.1.14.2.4	Variation 4:	Halogen Directed <i>ortho</i> -Lithiation Groups	367
8.1.14.2.5	Variation 5:	Sulfur-Based Directed <i>ortho</i> -Lithiation Groups	369
8.1.14.2.6	Variation 6:	Other Carbonyl Directed <i>ortho</i> -Lithiation Groups	370
8.1.14.2.7	Variation 7:	Phosphorus Directed <i>ortho</i> -Lithiation Groups	371
8.1.14.2.8	Variation 8:	Other Nitrogen Directed <i>ortho</i> -Lithiation Groups	372
8.1.14.2.9	Variation 9:	Other Directed <i>ortho</i> -Lithiation Groups	373
8.1.14.3	Method 3:	Furyllithium Compounds	374
8.1.14.3.1	Variation 1:	By Direct Deprotonation	374
8.1.14.3.2	Variation 2:	By Halogen–Lithium Exchange	375
8.1.14.3.3	Variation 3:	By Directed <i>ortho</i> -Lithiation	375
8.1.14.4	Method 4:	Thienyllithium Compounds	376
8.1.14.4.1	Variation 1:	By Direct Deprotonation	376
8.1.14.4.2	Variation 2:	By Halogen–Lithium Exchange	377
8.1.14.4.3	Variation 3:	By Directed <i>ortho</i> -Lithiation	378
8.1.14.5	Method 5:	Pyrrolyllithium Compounds	379
8.1.14.5.1	Variation 1:	By Direct Deprotonation	379
8.1.14.5.2	Variation 2:	By Halogen–Lithium Exchange	380
8.1.14.5.3	Variation 3:	By Directed <i>ortho</i> -Lithiation	381
8.1.14.6	Method 6:	Imidazolylithium Compounds	381
8.1.14.6.1	Variation 1:	By Direct Deprotonation	381
8.1.14.6.2	Variation 2:	By Halogen–Lithium Exchange	382
8.1.14.7	Method 7:	Oxazolylithium and Isoxazolylithium Compounds	383
8.1.14.7.1	Variation 1:	Lithiation of Oxazoles	383
8.1.14.7.2	Variation 2:	Lithiation of Isoxazoles	384
8.1.14.8	Method 8:	Pyrazolylithium Compounds	384
8.1.14.9	Method 9:	Thiazolylithium Compounds	385
8.1.14.10	Method 10:	Benzofuryllithium Compounds	386
8.1.14.11	Method 11:	Benzothiennyllithium Compounds	386
8.1.14.12	Method 12:	Indolylithium Compounds	387

8.1.14.12.1	Variation 1:	By Direct Deprotonation	387
8.1.14.12.2	Variation 2:	By Halogen–Lithium Exchange	389
8.1.14.12.3	Variation 3:	By Directed <i>ortho</i> -Lithiation	391
8.1.14.13	Method 13:	Pyridyllithium Compounds	392
8.1.14.13.1	Variation 1:	By Halogen–Lithium Exchange	393
8.1.14.13.2	Variation 2:	By Directed <i>ortho</i> -Lithiation	395
8.1.14.14	Method 14:	Quinolyllithium Compounds	398
8.1.14.15	Method 15:	Diazinyllithium, Benzodiazinyllithium, and Other Azinyllithium Compounds	399
8.1.14.15.1	Variation 1:	Pyrazinyllithium Compounds	399
8.1.14.15.2	Variation 2:	Pyrimidinyllithium Compounds	400
8.1.14.15.3	Variation 3:	Pyridazinyllithium Compounds	401
8.1.14.15.4	Variation 4:	Benzodiazinyllithium Compounds	402
8.1.14.15.5	Variation 5:	Other Azinyllithium Compounds	402
8.1.14.16	Method 16:	Other Azolyllithium Compounds	403
8.1.14.17	Method 17:	Dibenzo-Fused Hetarylithium Compounds	404
8.1.14.17.1	Variation 1:	Dibenzofuryllithium Compounds	404
8.1.14.17.2	Variation 2:	Dibenzothiényllithium Compounds	405
8.1.14.17.3	Variation 3:	Carbazolyllithium Compounds	405
8.1.14.17.4	Variation 4:	Dibenzo[1,4]dioxinyllithium Compounds	406
8.1.14.17.5	Variation 5:	Thianthrenyllithium Compounds	407
8.1.14.17.6	Variation 6:	Phenothiazinyllithium Compounds	407
8.1.14.17.7	Variation 7:	Dibenzo[<i>b,f</i>]azepinyllithium Compounds	407
8.1.14.17.8	Variation 8:	Pyrido[3,4- <i>b</i>]indolyllithium Compounds	408
		Applications of Product Subclass 14 in Organic Synthesis	408
8.1.14.18	Method 18:	Aryne Formation	409
8.1.14.19	Method 19:	Functional Group Interchange	409
8.1.14.20	Method 20:	Transmetalation and Coupling Reactions	410
8.1.14.21	Method 21:	Aryllithium Compounds in Ring Formation and Heterocycle Construction	412
8.1.14.22	Method 22:	Natural Product Synthesis	413
8.1.15	Product Subclass 15: α-Lithiocarboxylic Acids and Related Lithium Compounds (Including Enolates)		
	J. R. Green		
8.1.15	Product Subclass 15: α-Lithiocarboxylic Acids and Related Lithium Compounds (Including Enolates)		427
	Synthesis of Product Subclass 15		427
8.1.15.1	Method 1:	Enolate Generation by Direct Deprotonation of Alkanoic Acid Derivatives	427
8.1.15.2	Method 2:	Enolate Generation by Nucleophilic Attack on Ketene Acetals	430
8.1.15.3	Method 3:	Enolate Generation by Conjugate Addition or Reduction	430
8.1.15.4	Method 4:	Enolate Generation by Reduction or Metal–Halogen Exchange of α -Substituted Derivatives	432
	Applications of Product Subclass 15 in Organic Synthesis		434

8.1.15.5	Method 5:	Electrophile Incorporation: Protonation (C—Li → C—H)	434
8.1.15.6	Method 6:	Electrophile Incorporation: Alkylation (C—Li → C—C)	436
8.1.15.6.1	Variation 1:	Arylation and Vinylation	441
8.1.15.7	Method 7:	Electrophile Incorporation: Heteroatom Incorporation (C—Li → C—X)	444
8.1.15.7.1	Variation 1:	Silylation	444
8.1.15.7.2	Variation 2:	Hydroxylation	446
8.1.15.7.3	Variation 3:	Amination	448
8.1.15.7.4	Variation 4:	Halogenation	450
8.1.15.8	Method 8:	Electrophile Incorporation: Reaction with Carbonyl Compounds and Imines (C—Li → C—C—X)	452
8.1.15.9	Method 9:	Electrophile Incorporation: Epoxides and Aziridines (C—Li → C—C—C—X)	458
8.1.15.10	Method 10:	Electrophile Incorporation: Coupling Reactions; Enolate Dimerization (C—Li → C—C—C=X)	461
8.1.15.11	Method 11:	Electrophile Incorporation: Reaction with Carboxy Compounds (C—Li → C—C=X)	463
8.1.15.12	Method 12:	Electrophile Incorporation: Michael Addition (C—Li → C—C—C—C=X)	468
8.1.15.13	Method 13:	Enolate Rearrangements: Claisen and Related Rearrangements	473
8.1.15.14	Method 14:	Enolate Rearrangements: [2,3]-Wittig Rearrangements of Dienolates	477
8.1.15.15	Method 15:	Enolate Rearrangements: Reactions with Nucleophiles: Formation of Ketones	477
8.1.16	Product Subclass 16: β-Lithiocarboxylic Acids and Related Lithium Compounds		
	D. Caine		
8.1.16	Product Subclass 16: β-Lithiocarboxylic Acids and Related Lithium Compounds		
	Synthesis of Product Subclass 16		
8.1.16.1	Method 1:	Arene-Catalyzed Reductive Lithiations of β -Halogenated Carboxylates and 3-Arylpropenoates	487
8.1.16.2	Method 2:	Tin-Lithium Exchange of β -Stannyl Carboxamides	490
8.1.16.3	Method 3:	Hydrogen-Lithium Exchange of Carboxylates and Carboxamides Containing Carbanion-Stabilizing Groups at the β -Position	491
8.1.16.3.1	Variation 1:	Hydrogen-Lithium Exchange of β -Phenylsulfonylated Ortho Esters	495
8.1.16.4	Method 4:	Addition of Alkylolithium Reagents to Lithiated Cinnamic Acids and Cinnamyl Amides	496

8.1.17	Product Subclass 17: α-Lithio Aldehydes, α-Lithio Ketones, and Related Compounds	
	D. Caine	
<hr/>		
8.1.17	Product Subclass 17: α-Lithio Aldehydes, α-Lithio Ketones, and Related Compounds	499
	Synthesis of Product Subclass 17	502
8.1.17.1	Preformed Lithium Enolates of Carbonyl Compounds	502
8.1.17.1.1	Method 1: Deprotonation of Carbonyl Compounds with Lithium Dialkylamides and Other Strong Bases	502
8.1.17.1.1.1	Variation 1: Regioselective Synthesis of Kinetic (Less Substituted) Enolates of α -Substituted Unsymmetrical Saturated Ketones	504
8.1.17.1.1.2	Variation 2: Regioselective Synthesis of Thermodynamic Enolates of α -Substituted Unsymmetrical Saturated Ketones	509
8.1.17.1.1.3	Variation 3: Kinetic and Thermodynamic Lithium Enolates of Unsymmetrical α - and α' -Dimethylene Ketones	510
8.1.17.1.1.4	Variation 4: Stereoselective Synthesis of <i>E</i> - or <i>Z</i> -Isomers of Acyclic Ketone Lithium Enolates	512
8.1.17.1.1.5	Variation 5: Enantioselective Synthesis of Lithium Enolates by Deprotonation of Prochiral Ketones with Chiral, Nonracemic Lithium Amide Bases	516
8.1.17.1.1.6	Variation 6: Kinetic Deprotonation of α,β -Unsaturated Ketones	519
8.1.17.1.2	Method 2: Regio- and Stereoselective Formation of Lithium Enolates by Indirect Methods	522
8.1.17.1.2.1	Variation 1: Lithium/Liquid Ammonia Reduction of α,β -Unsaturated Ketones	522
8.1.17.1.2.2	Variation 2: Lithium/Liquid Ammonia Reduction of Ketones with Leaving Groups at the α -Position	524
8.1.17.1.2.3	Variation 3: Conjugate Addition of Lithium Dialkylcuprate Reagents to α,β -Unsaturated Ketones	525
8.1.17.1.2.4	Variation 4: Generation of Lithium Enolates from Enol Derivatives of Carbonyl Compounds	526
8.1.17.1.2.5	Variation 5: Generation of Lithium Enolates by Miscellaneous Methods	527
8.1.17.1.3	Method 3: Alkylations of Preformed Lithium Enolates	527
8.1.17.1.3.1	Variation 1: Intermolecular Alkylations	529
8.1.17.1.3.2	Variation 2: Stereochemistry of Intermolecular Alkylation of Lithium Enolates	532
8.1.17.1.3.3	Variation 3: Intramolecular Alkylations	537
8.1.17.1.4	Method 4: Directed Aldol Reactions of Preformed Lithium Enolates	538
8.1.17.1.4.1	Variation 1: Aldol Reactions of Lithium <i>Z</i> -Enolates	540
8.1.17.1.4.2	Variation 2: Diastereofacial Selectivity of Aldol Reactions of Chiral, Nonracemic Lithium <i>Z</i> -Enolates	541
8.1.17.1.4.3	Variation 3: Aldol Reactions of Lithium <i>E</i> -Enolates	542
8.1.17.1.4.4	Variation 4: Aldol Reactions of Lithium Enolates with Chiral Aldehydes	543
8.1.17.1.4.5	Variation 5: Asymmetric Aldol Reactions Using Chiral Lithium Amide Bases	546
8.1.17.1.4.6	Variation 6: Reactions of Preformed Lithium Enolates with Preformed Iminium Salts	548

8.1.17.1.5	Method 5:	Michael Reactions of Preformed Lithium Enolates	548
8.1.17.1.5.1	Variation 1:	Michael Reactions of Preformed Lithium <i>E</i> - and <i>Z</i> -Enolates with α,β -Unsaturated Ketones and Esters	549
8.1.17.1.5.2	Variation 2:	Intermolecular Reactions of Preformed Lithium Enolates with Various Michael Acceptors	551
8.1.17.1.5.3	Variation 3:	Sequential Michael Reactions of Preformed Lithium Cross-Conjugated Dienolates	553
8.1.17.1.6	Method 6:	C-Acylation Reactions of Preformed Lithium Enolates	555
8.1.17.1.7	Method 7:	Reactions of Lithium Enolates at Carbon with Heteroatom Electrophiles	559
8.1.17.1.7.1	Variation 1:	C-Hydroxylation Reactions	559
8.1.17.1.7.2	Variation 2:	Sulfonylation, Selenenylation, and Halogenation Reactions	562
8.1.17.1.8	Method 8:	Diastereo- and Enantioselective Kinetic Protonation of Lithium Enolates	567
8.1.17.1.8.1	Variation 1:	Diastereoselective Protonation of Chiral Enolates	567
8.1.17.1.8.2	Variation 2:	Enantioselective Protonation of Achiral Lithium Enolates	569
8.1.17.1.8.3	Variation 3:	Catalytic Enantioselective Protonation of Achiral Lithium Enolates	571
8.1.17.1.9	Method 9:	Transmetalation of Lithium Enolates	572
8.1.17.1.9.1	Variation 1:	Lithium–Main Group Metal Exchange	573
8.1.17.1.9.2	Variation 2:	Lithium–Transition Metal Exchange	574
8.1.17.2		Dilithium and Mixed Lithium/Sodium Dienolates of β -Dicarbonyl Compounds	574
8.1.17.2.1	Method 1:	Preparation of Dilithium and Lithium/Sodium Dienolates of β -Dicarbonyl Compounds	575
8.1.17.2.2	Method 2:	γ -Alkylation of Dilithium or Lithium/Sodium Dienolates of β -Dicarbonyl Compounds	577
8.1.17.2.3	Method 3:	Aldol, Acylation, and Michael Reactions of Dilithium and Lithium/Sodium Dienolates of β -Dicarbonyl Compounds	580
8.1.17.3		Lithium Azaenolates	582
8.1.17.3.1	Method 1:	Deprotonations of Aldimines and Ketimines with Lithium Bases	583
8.1.17.3.2	Method 2:	Deprotonation of Hydrazones with Lithium Bases	586
8.1.17.3.3	Method 3:	Deprotonation of Oximes and Oxime Ethers with Alkylolithium Reagents	588
8.1.17.3.4	Method 4:	Special Methods for Synthesis of Lithium Azaenolates	589
8.1.17.3.5	Method 5:	C-Alkylation of Lithium Azaenolates	590
8.1.17.3.5.1	Variation 1:	Alkylation of Azaenolates of Imines	590
8.1.17.3.5.2	Variation 2:	Stereoselective Alkylation of Azaenolates of Imines	591
8.1.17.3.5.3	Variation 3:	Alkylation of Azaenolates of Hydrazones	594
8.1.17.3.6	Method 6:	Aldol Reactions of Lithium Azaenolates	597
8.1.17.3.6.1	Variation 1:	Aldol Reactions of Lithium Azaenolates of Imines	597
8.1.17.3.6.2	Variation 2:	Aldol Reactions of Lithium Azaenolates of Hydrazones	598
8.1.17.3.7	Method 7:	Acylation of Lithium Azaenolates	600
8.1.17.3.8	Method 8:	Michael Additions of Lithium Azaenolates	601
8.1.17.3.9	Method 9:	Reactions of Lithium Azaenolates with Selected Heteroatom Electrophiles	604

8.1.18	Product Subclass 18: β-Lithio Aldehydes, β-Lithio Ketones, and Related Compounds	
	D. Caine	
<hr/>		
8.1.18	Product Subclass 18: β-Lithio Aldehydes, β-Lithio Ketones, and Related Compounds	619
	Synthesis of Product Subclass 18	619
8.1.18.1	Method 1: Halogen–Lithium Exchange	619
8.1.18.2	Method 2: Reductive Lithiation of Halides and Phenyl Sulfides with Lithium Arene Radical Anions	622
8.1.18.3	Method 3: Lithium Homoenate Equivalents by Tellurium–Lithium Exchange	625
8.1.18.4	Method 4: α' - or α -Enolate-Protected Lithium Homoenolates: Dianionic Reagents	626
8.1.18.4.1	Variation 1: Preparation of β -Lithio Lithium α' -Enolates	626
8.1.18.4.2	Variation 2: Preparation of β -Lithio Lithium α -Enolates	628
8.1.18.5	Method 5: Carbolithiation of Protected α,β -Unsaturated Aldehydes	630
8.1.18.6	Method 6: Hydrogen–Lithium Exchange of Acetals and Ketals Containing Carbanion-Stabilizing Groups at the β -Position	631
8.1.19	Product Subclass 19: sp^3-Hybridized α-Lithio Ethers and O-Carbamates	
	S. MacNeil	
<hr/>		
8.1.19	Product Subclass 19: sp^3-Hybridized α-Lithio Ethers and O-Carbamates	637
	Synthesis of Product Subclass 19	637
8.1.19.1	Method 1: Substitution of Hydrogen	637
8.1.19.1.1	Variation 1: Stereospecific Deprotonation at Chiral, Nonracemic Centers	637
8.1.19.1.2	Variation 2: Diastereoselective Deprotonation by Substrate Control	638
8.1.19.1.3	Variation 3: Enantioselective Deprotonation/Kinetic Resolution Induced by Chiral Ligands	639
8.1.19.1.4	Variation 4: Chiral Base Induced Deprotonation	642
8.1.19.2	Method 2: Substitution of Tin	642
8.1.19.3	Method 3: Reductive Lithiation	643
8.1.19.3.1	Variation 1: Reductive Lithiation of Cl–C Bonds	643
8.1.19.3.2	Variation 2: Reductive Lithiation of S–C Bonds	644
8.1.19.3.3	Variation 3: Reductive Lithiation of C–C Bonds	645
8.1.19.4	Method 4: Carbolithiation	646
	Applications of Product Subclass 19 in Organic Synthesis	647
8.1.19.5	Method 5: Electrophilic Quench of α -Lithio Oxygen Compounds	647
8.1.19.5.1	Variation 1: α -Lithio Oxygen Compounds as Homoenate Equivalents	647
8.1.19.6	Method 6: Rearrangements of α -Lithio Oxygen Compounds	649
8.1.19.6.1	Variation 1: [1,2]-Wittig Rearrangements	649
8.1.19.6.2	Variation 2: [2,3]-Wittig Rearrangements	650
8.1.19.6.3	Variation 3: Rearrangements of α -Lithio Epoxides	653

8.1.20	Product Subclass 20: α-Lithio Sulfoxides T. Durst and M. Khodaei	
<hr/>		
8.1.20	Product Subclass 20: α-Lithio Sulfoxides	661
	Synthesis of Product Subclass 20	661
8.1.20.1	Method 1: Lithiation of Sulfoxides	661
	Applications of Product Subclass 20 in Organic Synthesis	663
8.1.20.2	Method 2: Alkylation of α -Lithio Sulfoxides	666
8.1.20.3	Method 3: Reaction with Aldehydes and Ketones	667
8.1.20.4	Method 4: Reaction with Imines	671
8.1.20.5	Method 5: Acylation of α -Lithio Sulfoxides	672
8.1.20.6	Method 6: Michael Addition	673
8.1.21	Product Subclass 21: α-Lithioamines R. E. Gawley, S. O'Connor, and R. Klein	
<hr/>		
8.1.21	Product Subclass 21: α-Lithioamines	677
	Synthesis and Applications of Product Subclass 21	682
8.1.21.1	Synthesis and Applications of Unstabilized α -Lithioamines	682
8.1.21.1.1	Method 1: Deprotonation and Electrophilic Substitution	683
8.1.21.1.2	Method 2: Transmetalation and Electrophilic Substitution	684
8.1.21.1.2.1	Variation 1: Synthesis of a Horner–Wittig Reagent	684
8.1.21.1.2.2	Variation 2: Addition of 2-Lithio-3-methyl-1-tritylaziridine to Benzaldehyde	685
8.1.21.1.2.3	Variation 3: Electrophilic Substitutions of 2-Lithio-1-methylpyrrolidine and 2-Lithio-1-methylpiperidine (Racemic)	685
8.1.21.1.2.4	Variation 4: Electrophilic Substitution of 2-Lithiopyrrolidine and 2-Lithiopiperidine (Scalemic)	687
8.1.21.1.2.5	Variation 5: Transmetalation and Electrophilic Substitution of a 1-Allyl-2-lithiopyrrolidine	688
8.1.21.1.2.6	Variation 6: Transmetalation and Enantioselective Electrophilic Substitution by Dynamic Thermodynamic Resolution	689
8.1.21.1.3	Method 3: Transmetalation and Sigmatropic Rearrangement	690
8.1.21.1.4	Method 4: Transmetalation and Anionic Cyclization	692
8.1.21.1.4.1	Variation 1: Synthesis of Pyrrolidines and Bicyclic Amines	692
8.1.21.1.4.2	Variation 2: Synthesis of (+)-Pseudoheliotridane via a Scalemic Organolithium	693
8.1.21.1.4.3	Variation 3: Tandem Cyclization/Ring Opening	694
8.1.21.1.4.4	Variation 4: Cyclizations onto Naphthyl Dihydrooxazoles	694
8.1.21.1.4.5	Variation 5: Intramolecular Michael Addition onto an Indole Ester	695
8.1.21.1.5	Method 5: Reductive Lithiation	696
8.1.21.1.5.1	Variation 1: Reduction and Electrophilic Substitution of α -Sulfinyl Aziridines	696
8.1.21.1.5.2	Variation 2: Sulfide Reduction and Anionic Cyclization	697
8.1.21.2	Synthesis and Applications of Dipole-Stabilized α -Lithioamines	697

8.1.21.2.1	Method 1:	Deprotonation and Electrophilic Substitution	699
8.1.21.2.1.1	Variation 1:	Deprotonation of a Piperidine <i>tert</i> -Butylformamide, Transmetalation to Copper, and Electrophilic Substitution	699
8.1.21.2.1.2	Variation 2:	Deprotonation of <i>N</i> - <i>tert</i> -Butoxycarbonylpyrrolidine and Electrophilic Substitution with Tributyltin Chloride	700
8.1.21.2.1.3	Variation 3:	Deprotonation of <i>N</i> - <i>tert</i> -Butoxycarbonyl- <i>N</i> -methylisobutylamine and Addition to Benzaldehyde	701
8.1.21.2.1.4	Variation 4:	Preferential Deprotonation of <i>N</i> - <i>tert</i> -Butoxycarbonyl- <i>N</i> -ethylcyclopropanamine at the Cyclopropyl Methine over the Ethyl Group	701
8.1.21.2.1.5	Variation 5:	Ring Contraction of 1- <i>tert</i> -Butoxycarbonyl-4-chloro-2-lithiopiperidine to a Cyclopropyl Intermediate, Followed by Deprotonation and Electrophilic Substitution	702
8.1.21.2.1.6	Variation 6:	Deprotonation and Palladium-Catalyzed Arylation	703
8.1.21.2.1.7	Variation 7:	Asymmetric Deprotonation Using a Chiral Base, and Addition to Benzophenone	704
8.1.21.2.1.8	Variation 8:	Asymmetric Deprotonation Using a Chiral Base: Transmetalation with Copper, and Vinylation	705
8.1.21.2.1.9	Variation 9:	Regio- and Stereoselective Deprotonation and Electrophilic Substitution of Imidazolidines	706
8.1.21.2.2	Method 2:	Transmetalation and Electrophilic Substitution	706
8.1.21.2.2.1	Variation 1:	Transmetalation from Tin to Lithium and then Copper, with 1,4-Addition	706
8.1.21.2.2.2	Variation 2:	Transmetalation from Tin to Lithium: Lithiation at Sites Not Available by Deprotonation	707
8.1.21.2.2.3	Variation 3:	Transmetalation of Organostannanes and Asymmetric Transformation of the First Kind: Synthesis of ¹³ C-Enriched L-Amino Acids	708
8.1.21.2.2.4	Variation 4:	Transmetalation of α -Stannylcarbamates and Addition to Aldehydes; Synthon of a Primary α -Lithioamine	710
8.1.21.2.3	Method 3:	Transmetalation of Stannyl Ureas with 1,2-Acyl Migration	711
8.1.21.2.4	Method 4:	Reductive Lithiation of Aminonitriles to Tertiary α -Lithioamines and Electrophilic Substitution	711
8.1.21.3	Synthesis and Applications of Mesomerically Stabilized α -Lithioamines		712
8.1.21.3.1	Method 1:	Deprotonation of a Chiral Allylic Amine Followed by Stereoselective Alkylation and Hydrolysis (Aldehyde Homoenate Synthon)	713
8.1.21.3.2	Method 2:	Transmetalation of a Chiral Allylic Amine Followed by Stereoselective Alkylation and Hydrolysis (Ketone Homoenate Synthon)	714
8.1.21.3.3	Method 3:	Transmetalation of <i>N</i> -(Tributylstannyl)methanimines Followed by Cycloaddition	715
8.1.21.4	Synthesis and Applications of Dipole- and Mesomerically Stabilized α -Lithioamines		716
8.1.21.4.1	Method 1:	Deprotonation of Achiral Substrates with an Achiral Base	717
8.1.21.4.1.1	Variation 1:	Preferential Deprotonation of Benzylic Protons with Spontaneous Intramolecular Cyclization	717

8.1.21.4.1.2	Variation 2:	Dilithiation of <i>N</i> - <i>tert</i> -Butoxycarbonylbenzylamine and 1,2-Addition to Acrolein	717
8.1.21.4.1.3	Variation 3:	Dilithiation of <i>tert</i> -Butyl Allylcarbamate, Transmetalation to Zinc, and Addition to Aldehydes and Ketones	718
8.1.21.4.1.4	Variation 4:	Deprotonation of Tetrahydroisoquinoline Pivalamides, Transmetalation to Magnesium, and Addition to Aldehyde	719
8.1.21.4.1.5	Variation 5:	Deprotonation of <i>N</i> -Benzyl- <i>N</i> -(<i>tert</i> -butoxycarbonyl)-4-methoxyaniline, Addition to Imines and Spontaneous Cyclization to Imidazolidinones	720
8.1.21.4.1.6	Variation 6:	Regioselective Deprotonation and Aza-[2,3]-Wittig Rearrangement	721
8.1.21.4.2	Method 2:	Deprotonation of Chiral Substrates	721
8.1.21.4.2.1	Variation 1:	Deprotonation and Alkylation of <i>N</i> -Benzyloxazolidinones	721
8.1.21.4.2.2	Variation 2:	Deprotonation of Chiral Tetrahydroisoquinolinyl Formamidine: Asymmetric Synthesis of Isoquinoline Alkaloids	722
8.1.21.4.2.3	Variation 3:	Deprotonation of Hexahydropyrido[3,4- <i>b</i>]indole Formamidines: Asymmetric Synthesis of Indole Alkaloids	724
8.1.21.4.2.4	Variation 4:	Deprotonation of Dihydrooxazole-Substituted Tetrahydroisoquinolines: Asymmetric Synthesis of Isoquinolines and Morphinan	725
8.1.21.4.2.5	Variation 5:	Deprotonation of Chiral Tetrahydroisoquinolines, Transmetalation to Magnesium, and Addition to Aldehydes: Asymmetric Synthesis of Phthalideisoquinoline Alkaloids	727
8.1.21.4.2.6	Variation 6:	α,α' -Dialkylation of Dihydroisoindole	728
8.1.21.4.2.7	Variation 7:	C_2 -Symmetric Dialkylation of Chiral Formamidinyl Binaphthoazepines	729
8.1.21.4.3	Method 3:	Deprotonation of Achiral Substrates with Chiral Base	729
8.1.21.4.3.1	Variation 1:	Asymmetric Regioselective Deprotonation of Allylic and Benzylic Positions over Alkyl Positions in <i>tert</i> -Butyl Carbamates	730
8.1.21.4.3.2	Variation 2:	Asymmetric Deprotonation of <i>N</i> -Benzyl- <i>N</i> - <i>tert</i> -butoxycarbonyl-4-methoxyaniline	731
8.1.21.4.3.3	Variation 3:	Asymmetric Deprotonation of <i>N</i> -Benzyl- <i>N</i> - <i>tert</i> -butoxycarbonyl-4-methoxyaniline and 1,4-Addition to Enones	732
8.1.21.4.3.4	Variation 4:	Deprotonation of <i>N</i> - <i>tert</i> -Butoxycarbonyl-4-methoxy- <i>N</i> -[(2 <i>E</i>)-3-phenylprop-2-enyl]aniline and Electrophilic Substitution: Synthesis of Either <i>R</i> - or <i>S</i> -Homoenolate Synthons	733
8.1.21.4.3.5	Variation 5:	Electrophilic Substitution of Aldehyde Homo enolate Synthons	734
8.1.21.4.3.6	Variation 6:	Asymmetric Deprotonation, Transmetalation to Aluminum or Titanium, and Addition to Aldehydes	735
8.1.21.4.3.7	Variation 7:	Asymmetric Deprotonation and Reverse Aza-Brook Rearrangement	737
8.1.21.4.3.8	Variation 8:	Asymmetric Deprotonation and Dearomatizing Cyclization of α -Lithio Amides	737
8.1.21.4.3.9	Variation 9:	Asymmetric Deprotonation and Alkylation of a Tricarbonylchromium–Benzyl Imine Complex	738

8.1.21.5	Synthesis and Applications of Dipole- and Heteroatom-Stabilized α -Lithioamines	739
8.1.21.5.1	Method 1: Oxygen- and <i>tert</i> -Butoxycarbonyl-Stabilized α -Lithioamines	739
8.1.21.5.2	Method 2: Sulfur- and Dipole-Stabilized α -Lithioamines	740
8.1.21.5.2.1	Variation 1: Asymmetric Corey–Seebach Synthesis of α -Hydroxyaldehydes Using a Diphenylvalinol-Derived Oxazolidinone	740
8.1.21.5.2.2	Variation 2: Asymmetric Corey–Seebach Synthesis of α -Hydroxyaldehydes Using a Camphor-Derived Oxazolidinone	741
8.1.21.5.3	Method 3: Nitrogen- and <i>tert</i> -Butoxycarbonyl-Stabilized α -Lithioamines	742
8.1.21.6	Synthesis and Applications of Non-Enolate Nitrogen Ylides	743
8.1.21.6.1	Method 1: Lewis Acid Activation of an Amine	743
8.1.21.6.1.1	Variation 1: Activation of an α -Aminoorganostannane with Boron Trifluoride	743
8.1.21.6.1.2	Variation 2: Activation of a Cyclic Amine with Boron Trifluoride, Deprotonation, Double Transmetalation, and Alkylation	744
8.1.21.6.1.3	Variation 3: Activation of an Aziridine with Borane, Deprotonation and Alkylation	745
8.1.21.6.1.4	Variation 4: Activation of a Benzylic Amine or Tetrahydroisoquinoline with Borane, Deprotonation and Alkylation	746
8.1.21.6.1.5	Variation 5: Activation of Dihydroisindole with Borane: Group-Selective Deprotonation with a Chiral Base, and Electrophilic Substitution	748
8.1.21.6.2	Method 2: Sigmatropic Rearrangements	750
8.1.21.6.2.1	Variation 1: Transmetalation of a 2-Tributylstannyllammonium Ion and [2,3]-Rearrangement	750
8.1.21.6.2.2	Variation 2: Activation and [2,3]-Rearrangement of <i>N</i> -Allyltetrahydroisoquinoline	751
8.1.22	Product Subclass 22: Lithium Nitronates N. Ono	
8.1.22	Product Subclass 22: Lithium Nitronates	759
	Synthesis of Product Subclass 22	759
8.1.22.1	Method 1: Deprotonation of Nitroalkanes	759
8.1.22.2	Method 2: Double Deprotonation of Nitroalkanes	760
8.1.22.3	Method 3: Addition of Nucleophiles to Nitroalkenes	760
	Applications of Product Subclass 22 in Organic Synthesis	762
8.1.22.4	Method 4: Nitroaldol Reaction	762
8.1.22.4.1	Variation 1: Nitro-Mannich Reaction	765
8.1.22.4.2	Variation 2: Michael Addition	765
8.1.22.5	Method 5: Acylation of Nitroalkanes	765
8.1.22.6	Method 6: Alkylation of Nitroalkanes	766
8.1.22.6.1	Variation 1: Alkylation via Radicals	767
8.1.22.6.2	Variation 2: Transition-Metal-Catalyzed Alkylation of Nitroalkanes	769
8.1.22.6.3	Variation 3: Arylation of Nitro Compounds	770
8.1.22.7	Method 7: Introduction of Heteroatoms into Nitroalkanes	771

8.1.23	Product Subclass 23: γ-Lithio Ethers and Related Compounds D. Caine	
<hr/>		
8.1.23	Product Subclass 23: γ-Lithio Ethers and Related Compounds	775
	Synthesis of Product Subclass 23	776
8.1.23.1	Method 1: Reductive Lithiation of Halide and Phenyl Sulfide Derivatives Containing Neutral (Uncharged) Alkoxy and Other Substituents at the γ -Position	776
8.1.23.1.1	Variation 1: Reductive Lithiation with Lithium Metal	776
8.1.23.1.2	Variation 2: Reductive Lithiations with Lithium Arene Radical Anions	777
8.1.23.2	Method 2: Reductive Lithiation of γ -Oxido and Related γ -Amido Halides and Phenyl Sulfides	779
8.1.23.2.1	Variation 1: Reductive Lithiation with Lithium Metal	780
8.1.23.2.2	Variation 2: Reductive Lithiation with Lithium Arene Radical Anions	781
8.1.23.3	Method 3: Halogen–Lithium Exchange	783
8.1.23.4	Method 4: Metal–Lithium Exchange	784
8.1.23.4.1	Variation 1: Selenium–Lithium Exchange	784
8.1.23.4.2	Variation 2: Tin–Lithium Exchange	785
8.1.23.5	Method 5: Hydrogen–Lithium Exchange	787
8.1.23.6	Method 6: Reductive Cleavage of Four-Membered Heterocycles by Lithium Arene Radical Anions	788
8.1.23.7	Method 7: Addition of Organolithium Reagents to Allylic Systems	790
8.1.24	Product Subclass 24: Carbamoyllithium and Trihalomethylithium Compounds C. Metallinos	
<hr/>		
8.1.24	Product Subclass 24: Carbamoyllithium and Trihalomethylithium Compounds	795
	Synthesis of Product Subclass 24	795
8.1.24.1	Carbamoyllithium Compounds	795
8.1.24.1.1	Method 1: Deprotonation of Formyl Hydrogen in Formamides	796
8.1.24.1.1.1	Variation 1: Using Lithium Diisopropylamide	796
8.1.24.1.1.2	Variation 2: Using <i>tert</i> -Butyllithium	796
8.1.24.1.2	Method 2: Reaction of Lithium Amide Bases and Carbon Monoxide	797
8.1.24.1.2.1	Variation 1: Using Lithium Amide Bases and Carbon Monoxide	797
8.1.24.1.2.2	Variation 2: Using Lithium Bis(carbamoyl)cuprates and Carbon Monoxide	798
8.1.24.1.3	Method 3: Transmetalation of Carbamoylmercury and Carbamoyltellurium Reagents	799
8.1.24.1.3.1	Variation 1: Using Bis(<i>N,N</i> -dialkylcarbamoyl)mercury Reagents	799
8.1.24.1.3.2	Variation 2: Using <i>N,N</i> -Dialkylcarbamoyltellurium Reagents	800
8.1.24.2	Trihalomethylithium Compounds	800
8.1.24.2.1	Method 1: Deprotonation of Chloroform	801

8.1.25	Product Subclass 25: Tris(organosulfanyl)- and Tris(organoselanyl)-methylithium Compounds	
	C. Nájera and M. Yus	
<hr/>		
8.1.25	Product Subclass 25: Tris(organosulfanyl)- and Tris(organoselanyl)-methylithium Compounds	805
	Synthesis and Applications of Product Subclass 25	805
8.1.25.1	Method 1: Alkylation Reactions of Tris(methylsulfanyl)- and Tris(phenylsulfanyl)methylithium	805
8.1.25.1.1	Variation 1: Reaction with Carbonyl Compounds	807
8.1.25.1.2	Variation 2: Michael-Type Reactions	808
8.1.25.2	Method 2: Synthesis of Other Sulfur-Containing Triheterosubstituted Methylithium Compounds	810
8.1.25.3	Method 3: Synthesis of Tris(methylselanyl)- and Tris(phenylselanyl)methylithium	810
8.1.26	Product Subclass 26: Bis(organosulfanyl)- and Bis(organoselanyl)methylithium Compounds	
	C. Nájera and M. Yus	
<hr/>		
8.1.26	Product Subclass 26: Bis(organosulfanyl)- and Bis(organoselanyl)methylithium Compounds	813
	Synthesis and Applications of Product Subclass 26	813
8.1.26.1	Method 1: Synthesis of Bis(methylsulfanyl)methylithium	813
8.1.26.2	Method 2: Synthesis of 1,3-Dithian-2-yllithium and Reaction with Alkyl Halides	814
8.1.26.2.1	Variation 1: Reaction with Epoxides	815
8.1.26.2.2	Variation 2: Reaction with Carbonyl Compounds	817
8.1.26.2.3	Variation 3: Michael-Type Reactions	818
8.1.26.2.4	Variation 4: Acylation Reactions	819
8.1.26.3	Method 3: Synthesis and Alkylation Reactions of Bis(phenylsulfanyl)-methylithium	819
8.1.26.3.1	Variation 1: Reaction with Carbonyl Compounds and Their α,β -Unsaturated Derivatives	820
8.1.26.4	Method 4: Synthesis of Other Cyclic 2-Lithio Dithioacetals	821
8.1.26.5	Method 5: Synthesis of α -Lithio α -Organosulfanyl Ethers	822
8.1.26.5.1	Variation 1: Methoxy(phenylsulfanyl)methylithium	822
8.1.26.5.2	Variation 2: 1,3-Oxathian-2-yllithium	823
8.1.26.6	Method 6: Synthesis of α -Lithio α -Arylsulfonyl Ethers	825
8.1.26.6.1	Variation 1: 2-(Arylsulfonyl)oxiran-2-yllithiums	826
8.1.26.6.2	Variation 2: 2-(Arylsulfonyl)tetrahydropyran-2-yllithiums	827
8.1.26.7	Method 7: Synthesis and Alkylation Reactions of α -Lithio α -Organosulfanyl and α -Lithio α -Organosulfinyl Sulfoxides	828
8.1.26.7.1	Variation 1: Reaction with Carbonyl Compounds and Their α,β -Unsaturated Derivatives	830
8.1.26.8	Method 8: Synthesis and Reactions of α -Lithio α -Organosulfanyl Sulfones	831
8.1.26.9	Method 9: Synthesis and Reactions of α -Lithio Selenoacetals	833

8.1.27	Product Subclass 27: α-Lithio Vinyl Ethers R. W. Friesen and C. F. Sturino	
<hr/>		
8.1.27	Product Subclass 27: α-Lithio Vinyl Ethers	841
	Synthesis of Product Subclass 27	841
8.1.27.1	Method 1: Deprotonation of Vinyl Ethers	842
8.1.27.1.1	Variation 1: Deprotonation of Acyclic and Cyclic Vinyl Ethers	842
8.1.27.1.2	Variation 2: Deprotonation of Allenyl Ethers	846
8.1.27.2	Method 2: Transmetalation of (α -Alkoxyvinyl)stannanes	847
8.1.27.3	Method 3: Lithium–Halogen Exchange	849
	Applications of Product Subclass 27 in Organic Synthesis	850
8.1.27.4	Method 4: Synthesis of α -Alkoxyvinyl Organometallic Compounds	850
8.1.27.4.1	Variation 1: Vinylstannanes	850
8.1.27.4.2	Variation 2: Vinylsilanes	851
8.1.27.5	Method 5: Synthesis of 2-Aryldihydropyrrolohydrazines	853
8.1.27.6	Method 6: α -Difluoro Ketones	854
8.1.27.7	Method 7: Synthesis of γ -Oxo Esters	855
8.1.27.8	Method 8: Synthesis of α -Hydroxy Ketones	856
8.1.27.9	Method 9: Synthesis of Substituted 1,4-Dioxins	858
8.1.27.10	Method 10: Synthesis of β - and γ -Hydroxyalkenes	859
